They hear about the concept and assume they need a name and logo for their business but they don't see what branding is truly about. Even if you know what a brand is, you may not know how to separate your personal brand from your business identity or what the difference is between the two. *Communicating National Image through Development and Diplomacy* James Pamment, Karin Gwinn Wilkins, 2018-05-07 This edited collection draws upon interdisciplinary research to explore new dimensions in the politics of image and aid. While development communication and public diplomacy are established research fields, there is little scholarship that seeks to understand how the two areas relate to one another. However, international development doctrine in the US, UK, and elsewhere increasingly suggests that they are integrated or at the very least should be at the level of national strategy. This timely volume considers a variety of cases in diverse regions, drawing upon a combination of theoretical and conceptual lenses that combine a focus on both aid and image. The result is a text that seeks to establish a new body of knowledge on how contemporary debates into public diplomacy, soft power, and the national image are fundamentally changing, not just the communication of aid but its wider strategies, modalities, and practices.
