Analysis of Speech of People with Parkinson's Disease Juan Rafael Orozco-Arroyave, 2016-11-11 The analysis of speech of people with Parkinson's disease is an interesting and highly relevant topic that has attracted the research community during several years. The advances in digital signal processing and pattern recognition have motivated the research community to work on the development of computational tools to perform automatic analysis of speech. Most of the contributions on this topic are focused on sustained phonation of vowels and only consider recordings of one language. This thesis addresses two problems considering recordings of sustained phonations of vowels and continuous speech signals: 1. the automatic classification of Parkinson's patients vs healthy speakers and 2. the prediction of the neurological state of the patients according to the motor section of the Unified Parkinson's Disease Rating Scale (UPDRS). Recordings of three languages are considered: Spanish, German, and Czech. German and Czech data were provided by other researchers and Spanish data were recorded in Medellin, Colombia, during the development of this work. Besides the classical approaches to assess pathological speech, a new method to model articulation deficits of Parkinson's patients is proposed. This new articulation modeling approach shows to be more accurate and robust than others to discriminate between Parkinson's patients and healthy speakers in the three considered languages.

The Determinant Phrase in the Spanish Interlanguage of Native Speakers of Swahili Maria Landa Buil, 2014-06-02 This book makes a significant contribution to the Second Language Acquisition research field as it is the only study that exists on the acquisition of the Spanish Determiner Phrase (DP) by speakers of a Bantu language. The corpus was compiled using data from 14 interviews carried out over a 25-month period. The subjects of the study were four Swahili speakers learning Spanish as a third language. English is their L2 at the State University of Zanzibar, Tanzania. The data collected longitudinally was used to characterize the DP of the Swahili-Spanish Interlanguage (IL) and observe Bantu transfer. This study also represents an important contribution to the discussion on Creole formation since it provides valuable information on the role played by adult speakers in the formation of Creole languages. In this book, the features of the DP in the IL are compared with those of the DP found in three Spanish lexifier Creoles: Palenquero, Chabacano, and Papiamentu. Although similar work has been done comparing the interlanguage of learners of English and French with Creoles that have these languages as lexifiers, no comparative studies of this type have been conducted for Spanish. Moreover, in the case of Palenquero, this study also represents the first of its kind to examine languages in which the substrate and the L1 involved belong to the same family of Bantu languages.

The Spanish and the Portuguese Present Perfect in Discourse Lukas Müller,2023-02-08 This monograph presents a theoretical and empirical study of the Spanish and the Portuguese Present Perfect PP The innovative claim is that the two tense forms operate in the field of tension between temporal quantification and temporal reference Based on this approach it presents the first in depth study that explicitly takes into account the level of discourse The following questions are investigated How do the Spanish and the Portuguese PP interact with discursive factors such as adjacent tense forms What kind of discursive meaning do they generate Which diachronic trends do their discourse functions reveal It is argued that while the Spanish PP tends to a referential drift traditionally labelled as an aoristic drift the Portuguese PP tends to preserve and specialize its quantificational meaning The book is of interest to all those working on the Present Perfect or generally in the field of tense and aspect in discourse

[More than a Glitch](#) Meredith Broussard,2023-03-14 When technology reinforces inequality it s not just a glitch it s a signal that we need to redesign our systems to create a more equitable world The word glitch implies an incidental error as easy to patch up as it is to identify But what if racism sexism and ableism aren t just bugs in mostly functional machinery what if they re coded into the system itself In the vein of heavy hitters such as Safiya Umoja Noble Cathy O Neil and Ruha Benjamin Meredith Broussard demonstrates in *More Than a Glitch* how neutrality in tech is a

myth and why algorithms need to be held accountable Broussard a data scientist and one of the few Black female researchers in artificial intelligence masterfully synthesizes concepts from computer science and sociology She explores a range of examples from facial recognition technology trained only to recognize lighter skin tones to mortgage approval algorithms that encourage discriminatory lending to the dangerous feedback loops that arise when medical diagnostic algorithms are trained on insufficiently diverse data Even when such technologies are designed with good intentions Broussard shows fallible humans develop programs that can result in devastating consequences Broussard argues that the solution isn't to make omnipresent tech more inclusive but to root out the algorithms that target certain demographics as other to begin with With sweeping implications for fields ranging from jurisprudence to medicine the ground breaking insights of *More Than a Glitch* are essential reading for anyone invested in building a more equitable future *Comparative Law for*
