Today s world is one marked by the signs of digital capitalism and global capitalist expansion and China is increasingly being integrated into this global system of production and consumption As a result China s immediate material impact is now felt almost everywhere in the world however the significance and process of this integration is far from understood This study shows how the a priori categories of statistical reasoning came to be re born and re lived in the People s Republic as essential conditions for the possibility of a new mode of knowledge and governance From the ruins of the Maoist revolution China has risen through a mode of quantitative self objectification As the author argues an epistemological rift has separated the Maoist years from the present age of the People s Republic which appears on the global stage as a mirage This study is an ethnographic investigation of concepts of the conceptual forces that have produced and been produced by two forms of knowledge life and governance As the author shows the world of China contrary to the common view is not the Chinese world it is a symptomatic moment of our world at the present time
