My belief about myself as a learner when I entered the class was a positive one. I attended a college prep school for high school and went to Oregon State University last year. I had plenty of practice with different learning techniques and found what works well for me. I believe I'm more of a visual learner than an auditory learner. It is easier to see a powerpoint and retain the knowledge then listen to a lecture and have the same retention. Entering the class I thought I liked working in groups more than working individually on projects, but that has since changed. I think it is more beneficial to me to work alone because I can get more done. When I entered the class I believed that reading the material closer to the due date was a better idea because I may not remember what I had read if I didn't.

What I have discovered about myself, as a learner over the term is vast. I learned that I can read the material way in advance and just briefly skim over the text and remember just about everything, were as I thought reading closer was more beneficial. I also learned that working in groups really isn't my specialty. I prefer working by myself because I'm able to get a lot more done and not have to worry about other people forgetting their part of the project. I don't like having to worry about other people not following through. I also learned that looking at the daily record in advanced helped me

The Humble Argument Roy K. Humble,2023-04-01

The Humble Argument is so much more than a writing textbook It gives you tools tips and tricks that actually explain what a writer does It doesn't sugarcoat the process or dumb down the very real challenges that entering a college writing space requires This book is more like a friend It's the kind of friend that will coach you through a tough time and encourage you and it will make you laugh while you go through it It's the kind of friend who holds your hair back when you're sick of writing and gives you the courage to try again

Roy K Humble is the kind of writing teacher who understands the struggle of learning how to write arguments like a college student and doesn't just tell you what you want to hear. His lessons here are profound but in the sense that they are delivered by someone who wants you to feel included in the conversation about what good college writing should be. He writes to students in language they can understand without becoming English majors and with just enough humor to keep them reading. He writes for faculty moving step by step through the unadorned guiding principles of effective formal writing so that faculty have a great framework on which to build their classes. Perhaps most importantly, Humble understands that the price of a book matters to students so his books are affordable. From every perspective, Humble gets it. The Humble Argument has students covered on these important topics: Understanding argument as an idea, Grasping the stages of the writing process, Organizing an argument around rhetorical principles, Thinking for yourself as a college student, Crafting a careful and clear thesis, Gathering and synthesizing evidence to support a thesis, Guiding readers through a thoughtful persuasive essay.

EU Socio-Economic Governance in Central and Eastern Europe Mario Munta, 2021-04-19. This book investigates to what extent and how the European Semester impacts on national employment policy in four EU member states of the Central and Eastern European CEE region. Using an original theoretical and methodological framework and based on empirical evidence from extensive interviews with experts in the field, this book examines the relation between EU preferences, exemplified by the yearly list of country-specific recommendations, and national policy responses to EU suggestions, tracing the extent to which policy change can be attributed to the influence of the European Semester. It extracts three potential mechanisms of European Semester influence on policy change: external pressure, mutual learning, and creative appropriation, and identifies key contributing and inhibiting factors. The book provides several policy recommendations regarding the organisation and workings of the European Semester process. This text will be of key interest to students, academics, and practitioners in European and EU politics.
