Extreme Weather

Weather can change very fast. Sometimes, the weather becomes very extreme. Extreme weather means weather that is very strong or dangerous. There are many types of extreme weather. Some of these are thunderstorms, tornadoes, hurricanes, and blizzards.

Thunderstorms happen when it rains a lot, and there are loud sounds of thunder. Sometimes you can see lightning flash across the sky. Lightning is very bright and can be dangerous. If you hear thunder, it's a good idea to go inside and stay safe.

A tornado is a strong wind that moves in a spinning circle. It can pick up trees and houses. Tornadoes usually happen in the spring when warm air meets cold air. Tornadoes are scary, but people who live in places where tornadoes happen know how to stay safe.

A hurricane is a huge storm that happens over the ocean. Hurricanes have strong winds and lots of rain. They can make the ocean waves very big. When a hurricane is coming, people go to safe places to stay until the storm is over.

A blizzard is a snowstorm with very strong winds. It can be hard to see because the snow blows around so much. Blizzards can make it very cold. People need to stay inside and keep warm during a blizzard.

Extreme weather can be scary, but we can stay safe if we know what to do. Always listen to the weather forecast, and follow safety rules.
