Education 2.0 Leonard J. Waks, 2015-11-17 Thirty years of spirited school reforms have failed to improve our schools and instead have left our public school systems in disarray Meanwhile employment prospects for high school and college graduates are fading and the public is losing faith in its schools The education paradigm inherited from the Industrial Era is in crisis In the last decade however the Internet and new Web 2.0 technologies have placed the entirety of human knowledge in the hands of everyone What will our educational institutions make of this unprecedented flood of Web based learning resources How can schools be transformed to accommodate the new possibilities for personal and social learning Leonard Waks gathers all the pieces of our current educational puzzle together in this groundbreaking book Drawing on new organizational models grounded in complexity theory Waks maps out an inspiring new paradigm for education in the Internet age and connects all the dots in constructing detailed models for new schools now transformed into open learning centers Finally Waks details action steps readers can take to speed this transformative process along in their own locations

The Marvelous Clouds John Durham Peters, 2015-06-19 An ambitious re writing a re synthesis even of concepts of media and culture It is nothing less than an attempt at a history of Being Los Angeles Review of Books When we speak of clouds these days it is as likely that we mean data clouds or network clouds as cumulus or stratus In their sharing of the term both kinds of clouds reveal an essential truth that the natural world and the technological world are not so distinct In *The Marvelous Clouds* John Durham Peters argues that though we often think of media as environments the reverse is just as true environments are media Peters defines media expansively as elements that compose the human world Drawing from ideas implicit in media philosophy Peters argues that media are more than carriers of messages they are the very infrastructures combining nature and culture that allow human life to thrive Through an encyclopedic array of examples from the oceans to the skies *The Marvelous Clouds* reveals the long prehistory of so called new media Digital media Peters argues are an extension of early practices tied to the establishment of civilization such as mastering fire building calendars reading the stars creating language and establishing religions New media do not take us into uncharted waters but rather confront us with the deepest and oldest questions of society and ecology how to manage the relations people have with themselves others and the natural world A wide ranging meditation on the many means we have

employed to cope with the struggles of existence from navigation to farming meteorology to Google The Marvelous Clouds shows how media lie at the very heart of our interactions with the world around us *After Disruption* Trevor

Owens,2024-05-06 The digital age is burning out our most precious resources and the future of the past is at stake In *After Disruption A Future for Cultural Memory* Trevor Owens warns that our institutions of cultural memory libraries archives museums humanities departments research institutes and more have been disrupted and largely not for the better He calls for memory workers and memory institutions to take back control of envisioning the future of memory from management consultants and tech sector evangelists *After Disruption* posits that we are no longer planning for a digital future but instead living in a digital present In this context Owens asks how we plan for and develop a more just sustainable and healthy future for cultural memory The first half of the book draws on critical scholarship on the history of technology and business to document and expose the sources of tech startup ideologies and their pernicious results revealing that we need powerful and compelling counter frameworks and values to replace these ideologies The second half of the book makes the case for the centrality of maintenance care and repair as interrelated frameworks to build a better future in which libraries archives and museums can thrive as sites of belonging and connection through collections Informing the News Thomas E.

Patterson,2013-10-08 As the journalist Walter Lippmann noted nearly a century ago democracy falters if there is no steady supply of trustworthy and relevant news Today s journalists are not providing it Too often reporters give equal weight to facts and biased opinion stir up small controversies and substitute infotainment for real news Even when they get the facts rights they often misjudge the context in which they belong Information is the lifeblood of a healthy democracy Public opinion and debate suffer when citizens are misinformed about current affairs as is increasingly the case Though the failures of today s communication system cannot be blamed solely on the news media they are part of the problem and the best hope for something better Patterson proposes knowledge based journalism as a corrective Unless journalists are more deeply informed about the subjects they cover they will continue to misinterpret them and to be vulnerable to manipulation by their sources In this book derived from a multi year initiative of the Carnegie Corporation and the Knight Foundation Patterson calls for nothing less than a major overhaul of journalism practice and education The book speaks not only to journalists but to all who are concerned about the integrity of the information on which America s democracy depends **Political**
