Active Aging and Disease Management Helena Canh o, Jaime C. Branco, Giuseppe Liotta, 2019-01-11 Population aging and the associated burden of chronic diseases are one of the main challenges in public health worldwide This Research Topic on Active Aging and Disease Management provides a comprehensive overview of population aging through fourteen comprehensive papers Chapter 1 discusses an overview of health systems in active and healthy aging while Chapter 2 focuses on the role of lifestyles exercise and new technologies Chapter 3 debates psychological and cognitive issues in aging and finally in Chapter 4 an older people self assessment is proposed and the role of communities and supporters are highlighted We think that real social and health care integration at community level could be the key point to deliver effective health promotion and preventive intervention Enjoy the reading **Coming of Political Age** Rebecca M.

Callahan, Chandra Muller, 2013-03-07 As one of the fastest growing segments of the American population the children of immigrants are poised to reshape the country's political future The massive rallies for immigration rights in 2006 and the recent push for the DREAM Act both heavily supported by immigrant youth signal the growing political potential of this crucial group While many studies have explored the political participation of immigrant adults we know comparatively little about what influences civic participation among the children of immigrants *Coming of Political Age* persuasively argues that schools play a central role in integrating immigrant youth into the political system The volume shows that the choices we make now in our educational system will have major consequences for the country's civic health as the children of

immigrants grow and mature as citizens *Coming of Political Age* draws from an impressive range of data including two large surveys of adolescents in high schools and interviews with teachers and students to provide an insightful analysis of trends in youth participation in politics Although the children of both immigrant and native born parents register and vote at similar rates the factors associated with this likelihood are very different While parental educational levels largely explain voting behavior among children of native born parents this volume demonstrates that immigrant children's own education in particular their exposure to social studies strongly predicts their future political participation Learning more about civic society and putting effort into these classes may encourage an interest in politics suggesting that the high school civics curriculum remains highly relevant in an increasingly disconnected society Interestingly although their schooling predicts whether children of immigrants will vote how they identify politically depends more on family and community influences As budget cuts force school administrators to realign academic priorities this volume argues that any cutback to social science programs may effectively curtail the political and civic engagement of the next generation of voters While much of the literature on immigrant assimilation focuses on family and community *Coming of Political Age* argues that schools and social science courses in particular may be central to preparing the leaders of tomorrow The insights and conclusions presented in this volume are essential to understand how we can encourage more participation in civic action and improve the functioning of our political system

Adolescents and Their Families Richard M. Lerner, Domini R. Castellino, 2013-12-02 First published in 1999 The adolescent period is marked by changes in the biological, psychological, cognitive, and social dimensions of the individual as well as by changes in the adolescent's multilevel context, i.e., the peers, family, school, and other institutions in his or her ecology Adolescence is a dynamic period, one which exemplifies the importance of understanding the relations between the developing individual and his or her changing context The articles included in this volume represent the current range of scholarship pertaining to adolescents and their families and exemplify the use of such an approach The articles underscore

the continual importance of the family across adolescence

Metropolitan Desegregation Robert Green, 2013-11-11 Most of the findings in this book are based on the work of a team of researchers from Urban Affairs Programs at Michigan State University. From 1976 to 1981 the team observed the progress of school desegregation in metropolitan Wilmington, Delaware, which encompasses New Castle County. The project was made possible by a grant from the Rockefeller Foundation Division of Social Sciences. Metropolitan desegregation is a strategy deserving of national attention because this country's black population has become increasingly concentrated within central cities. Desegregation solutions must be found that encompass America's white suburbs as well as its urban areas. In a 1977 statement the U.S. Commission on Civil Rights called metropolitan school desegregation the last frontier to be crossed in the long judicial effort to make equal educational opportunity a living reality. Moreover, the National Task Force on Desegregation Strategies concluded in 1979: "The simple demographic fact is that many large city school districts cannot desegregate by themselves. For children in such districts the best hope for attending a desegregated school lies in the implementation of metropolitan desegregation strategies, i.e., desegregation plans which do not stop at the city line but rather encompass at least some of the surrounding suburban areas." p. 1 The Michigan State University research team began its investigation in New Castle County, Delaware, after a three-judge federal district court ruled that area schools were illegally segregated between districts.

2015 Li Yuming, Li Wei, 2021-01-18 China, with the world's largest population, numerous ethnic groups, and vast geographical space, is also rich in languages. Since 2006, China's State Language Commission has been publishing annual reports on what is called language life in China. These reports cover language policy and planning initiatives at the national, provincial, and local levels; new trends in language use in a variety of social domains; and major events concerning languages in mainland China, Hong Kong, Macau, and Taiwan. Now, for the first time, these reports are available in English for anyone interested in Chinese language and linguistics. China's language education and social policies, as well as everyday language use among the ordinary people in China, are covered. The invaluable data contained in these reports provide an essential reference to researchers, professionals, policy makers, and China watchers.
