The Cambridge Handbook of Korean Linguistics Sungdai Cho, John Whitman, 2022-08-25 The Korean wave in music and film and Korea s rise to become the twelfth economic power in the world have boosted the world wide popularity of Korean language study The linguistic study of Korean with its rich syntactic and phonological structure complex writing system and unique socio historical context is now a rapidly growing research area Contributions from internationally renowned experts on the language provide a state of the art overview of key current research in Korean language and linguistics Chapters are divided into five thematic areas phonetics and phonology morphology and syntax semantics and pragmatics sociolinguistics and psycholinguistics and language pedagogy The Handbook includes cross linguistic data to illuminate the features of Korean and examples in Korean script making it suitable for advanced students and researchers with or without prior knowledge of Korean linguistics It is an essential resource for students and researchers wishing to explore the exciting and rapidly moving field of Korean linguistics *Nahuas and Spaniards* James Lockhart, 1991 The Nahua Indians of central Mexico often misleadingly called Aztecs after the quite ephemeral confederation that existed among them in late pre Hispanic times were the most populous of Mesoamerica s cultural linguistic groups at the time of the Spanish conquest They

remained at the center of developments for centuries thereafter since the bulk of the Hispanic population settled among them and they bore the brunt of cultural contact This collection of thirteen essays five of them previously unpublished by the leading authority on the postconquest Nahuas and Nahua Spanish interaction brings together pieces that reflect various facets of the author s research interests Underlying most of the pieces is the author s pioneering large scale use of Nahua manuscripts to illuminate the society and culture of native Mexicans in the Spanish colonial period The picture of the Nahuas that emerges shows them far less at odds with the colonial world from it what is useful to them and far more capable to maintaining their own pre conquest identity than has previously been suggested **A Grammar of Tamashek (Tuareg of Mali)** Jeffrey Heath,2011-05-03 This is a comprehensive description of Tamashek Tuareg spoken in Mali The varieties covered in this volume are those of Tamashek in the narrow sense excluding Tawellemett but including the other Malian varieties Goundam Timbuktu Gao Ansongo Kidal and the Gourma area south of the Niger River including Gosi and the outskirts of Hombori

mismatches ineffability and other cases of phonology morphology interaction The overview discusses the relevance of a variety of phenomena for theoretical issues in the field These include the debate over item based vs realizational approaches to morphology the question of whether cyclic effects can be subsumed under paradigmatic effects whether reduplication is phonological copying or morphological doubling whether infixation and suppletive allomorphy are phonologically optimizing and more The book is intended to be used in graduate or advanced undergraduate courses or as a reference for those pursuing individual topics in the phonology morphology interface **Studia Celtica** ,1976 **Studies on Reduplication**

Bernhard Hurch,2011-12-22 For several reasons mostly inherent to the different developments of generative grammar an increasing number of publications have dealt with reduplication in the past 20 years Reduplication lends itself perfectly as a test field for theories that opt for a non segmental organization of phonology and morphology As it happens frequently then the discussion centers around a rather small set of data for which alternative analysis are offered and which themselves are intended to contribute to the foundation of new theoretical developments The present volume which goes back to a conference on reduplication at the University of Graz Austria offers a broader approach to reduplication not only from different theoretical viewpoints but especially for its phenomenology Across theories a number of highly qualified authors deal with formal and functional perspectives with typological properties with semantics comparative issues the role of reduplication in language acquisition the acquisition of reduplicative systems sign languages creoles and pidgins general grammatical and cognitive principles the picture is completed by a series of language or language family specific studies as on Uto Aztecan Salish Tupi Guarani Moroccan and Cairene Arabic various African languages Chinese Turkish Indo European languages from India etc The overall scope of the conference was to contribute to a new level of discussion of the phenomenon across theories and across specializations and interests Update on Contributor s addresses PDF *Patterns of Vegetation and Herbivory in Arctic Tundra* George O.
