IEP Goal Writing for Speech-Language Pathologists Lydia Kopel, Elissa Kilduff, 2020-06-15 IEP Goal Writing for Speech Language Pathologists Utilizing State Standards Second Edition familiarizes the speech language pathologist SLP with specific Early Learning Standards ELS and Common Core State Standards CCSS as well as the speech language skills necessary for students to be successful with the school curriculum It also describes how to write defensible Individualized Education Plan IEP goals that are related to the ELS and CCSS SLPs work through a set of steps to determine a student's speech language needs First an SLP needs to determine what speech language skills are necessary for mastery of specific standards Then the SLP determines what prerequisite skills are involved for each targeted speech language skill Finally there is a determination of which Steps to Mastery need to be followed It is through this process that an SLP and team of professionals can appropriately develop interventions and an effective IEP The text takes an in-depth look at the following speech language areas: vocabulary, questions, narrative skills, summarize, compare and contrast, main idea and details, critical thinking, pragmatics, syntax, and morphology and articulation and phonological processes These areas were selected because they are the most commonly addressed skills of intervention for students aged 3 to 21 with all

levels of functioning For each listed area the text analyzes the prerequisite skills and the corresponding Steps to Mastery It provides a unique step by step process for transforming the Steps to Mastery into defensible IEP goals The key is to remember that the goal must be understandable doable measurable and achievable This text provides clear guidelines of quantifiable building blocks to achieve specific goals defined by the student s IEP School based SLPs are instrumental in helping students develop speech and language skills essential for mastery of the curriculum and standards All SLPs working with school aged children in public schools private practice or outpatient clinics will benefit from the information in this text New to the Second Edition Ten Speech and Language Checklists for determining speech and language needs of an individual 3 21 years of age as well as measuring progress Material on measuring progress including five performance updates Goal writing case studies for four students of different ages and skill levels A thoroughly updated chapter on writing goals with up to date examples Revised Prerequisite Skills and Steps to Mastery to reflect the current state of research Expanded focus on evidence based practice Disclaimer Please note that ancillary content such as documents audio and video etc may not be included as published in the original print version of this book

Mathematics Classrooms That Promote

Understanding Elizabeth Fennema, Thomas A. Romberg, 1999-04-01 Mathematics Classrooms That Promote Understanding synthesizes the implications of research done by the National Center for Research in Mathematical Sciences on integrating two somewhat diverse bodies of scholarly inquiry the study of teaching and the study of learning mathematics This research was organized around content domains and or continuing issues of education such as equity and assessment of learning and was guided by two common goals defining the mathematics content of the K 12 curriculum in light of the changing mathematical needs of citizens for the 21st century and identifying common components of classrooms that enable students to learn the redefined mathematics with understanding To accomplish these goals classrooms in which instruction facilitated the growth of understanding were established and or studied This volume reports and discusses the findings which grew out of this research and subsequent papers and discussions among the scholars engaged in the endeavor Section I Setting the Stage focuses on three major threads What mathematics should be taught how we should define and increase students understanding of that mathematics and how learning with understanding can be facilitated for all students Section II Classrooms That Promote Understanding includes vignettes from diverse classrooms that illustrate classroom discourse student work and student engagement in the mathematics described in Chapter 1 as well as the mental activities described in Chapter 2 These chapters also illustrate how teachers deal with the equity concerns described in Chapter 3 Section III addresses Developing Classrooms That Promote Understanding The knowledge of the teaching learning process gained from the research reported in this volume is a necessary prerequisite for implementing the revisions called for in the current reform movement The classrooms described show that innovative reform in teaching and learning mathematics is possible Unlike many volumes reporting research this book is written at a level appropriate for master s degree students Very few

references are included in the chapters themselves instead each chapter includes a short annotated list of articles for expanded reading which provides the scholarly basis and research substantiation for this volume
