Whats Wrong Applied Ethicists And Their Critics:

What's Wrong? David Boonin, Graham Oddie, 2004 *What's Wrong Applied Ethicists and Their Critics* is a thorough and engaging introduction to applied ethics that covers virtually all of the issues in the field. Featuring more than ninety-five articles, it addresses standard topics such as abortion, euthanasia, capital punishment, world hunger, and animal rights, and also delves into cutting-edge areas like cloning, racial profiling, same-sex marriage, prostitution, and slave reparations. The volume includes seminal essays by prominent philosophers Robert Nozick, James Rachels, Peter Singer, and Judith Jarvis Thomson, alongside work by newer voices in the field. Employing a unique approach to teaching argumentation, editors David Boonin and Graham Oddie unify the wealth of material presented in this collection. Each chapter opens with a featured article that takes a strong stand on a particular issue; the essays that immediately follow offer objections and critical responses to the arguments put forth in the featured selection. This format helps students learn how to better engage in debates because it illustrates how philosophers argue with each other. In addition, a general introduction describes strategies for understanding and evaluating the different types of arguments contained in the readings, while detailed chapter introductions enable students to see precisely how the arguments presented in the various writings are related to one another. Discussion questions and suggestions for further reading are included for each chapter. Ideal for courses in introduction to ethics and applied ethics, contemporary moral problems, *What's Wrong* can also be used in critical thinking courses that emphasize philosophical argumentation.

Insights into Ethical Theory and Practice Francis Fallon, 2022-02-06 Ethical issues hold great importance for all of us, but expert accounts of them are difficult to access for those outside academics. This volume bridges that gap by framing a variety of essays within the field in a way that renders them accessible to experts and non-experts alike. Many collections on ethics re-publish classic essays and offer contextualization and analysis, while other volumes of emerging innovative work presuppose a background in the field. This book uniquely borrows from both approaches, offering emerging innovative work carefully curating its order for sense and presenting the work so that non-experts may understand it. The field of ethics is an eclectic one. Where other collections on ethics may intimidate the reader by representing the field as an organized monolith or as impenetrable to outsiders, this volume is designed to give readers confidence and enthusiasm in approaching a diverse and lively subject.

Applied Ethics Elizabeth Jackson, Tyron Goldschmidt, Dustin Crummett, Rebecca Chan, 2021-11-03 *Applied Ethics: An Impartial Introduction* prepares readers to evaluate selected classical and contemporary problems in applied ethics in a way that does justice to their complexity without sacrificing clarity or fairness of representation. Its balanced exposition and analysis, enhanced by helpful pedagogical features, make it an ideal book for introducing the ethics of real-life problems, including abortion, animal rights, disability, the environment, poverty, and punishment.

A Companion to Applied Ethics R. G. Frey, Christopher Heath Wellman, 2008-04-15 Applied or practical ethics is perhaps the largest growth area in philosophy today, and many issues in

moral social and political life have come under philosophical scrutiny in recent years Taken together the essays in this volume including two overview essays on theories of ethics and the nature of applied ethics provide a state of the art account of the most pressing moral questions facing us today Provides a comprehensive guide to many of the most significant problems of practical ethics Offers state of the art accounts of issues in medical environmental legal social and business ethics Written by major philosophers presently engaged with these complex and profound ethical issues

The Non-identity Problem and the Ethics of Future People David Boonin, 2014 David Boonin presents a new account of the non identity problem a puzzle about our obligations to people who do not yet exist Our actions sometimes have an effect not only on the quality of life that people will enjoy in the future but on which particular people will exist in the future to enjoy it In cases where this is so the combination of certain assumptions that most people seem to accept can yield conclusions that most people seem to reject The non identity problem has important implications both for ethical theory and for a number of topics in applied ethics including controversial issues in bioethics environmental ethics and disability ethics It has been the subject of a great deal of discussion for nearly four decades but this is the first book length study devoted exclusively to its examination Boonin begins by explaining what the problem is why the problem matters and what criteria a solution to the problem must satisfy in order to count as a successful one He then provides a critical survey of the solutions to the problem that have thus far been proposed in the sizeable literature that the problem has generated and concludes by developing and defending an unorthodox alternative solution one that differs fundamentally from virtually every other available approach

Global Ethics Kimberly Hutchings, 2018-08-17 This revised edition of Kimberly Hutchings's best selling textbook provides an accessible introduction to the field of Global Ethics for students of politics international relations and globalization It offers an overview and assessment of key perspectives in Global Ethics and their implications for substantive moral issues in global politics These include the morality of state and non state violence the obligations of rich to poor in a globalizing world and the scope and nature of international human rights The second edition contains expanded coverage of pressing contemporary issues relating to migration changes in the technologies of war and the global environment Hutchings's excellent book helps non specialist students to understand the assumptions underpinning different moral traditions and enables them to formulate their own views on how to approach moral judgement and prescription essential in a world which though it is shared by all possesses massive cultural differences and inequalities of power

A Moral Defense of Recreational Drug Use Rob Lovering, 2015-08-12 Why does American law allow the recreational use of some drugs such as alcohol tobacco and caffeine but not others such as marijuana cocaine and heroin The answer lies not simply in the harm the use of these drugs might cause but in the perceived morality or lack thereof of their recreational use Despite strong rhetoric from moral critics of recreational drug use however it is surprisingly difficult to discern the reasons they have for deeming the recreational use of some drugs morally wrong In this book Rob Lovering lays out and dissects various arguments for the immorality of using

marijuana cocaine heroin and other drugs recreationally He contends that by and large these arguments do not succeed

Lovering's book represents one of the first works to systematically present analyze and critique arguments for the moral wrongness of recreational drug use Given this as well as the popularity of the morality based defense of the United States drug laws this book is an important and timely contribution to the debate on the recreational use of drugs **The Ethics of the Family** Linda Oravec,Adam Potthast,Stephen Scales,2010-03-08 Our families are our first and most important ethical training grounds But what is the family And what are our ethical commitments to our family members and to the broader moral community After a brief introductory chapter on basic ethical concepts and theories the essays in this volume provide readers with ethical analyses of issues ranging from same sex marriage to a controversial proposal to license parents The chapters cover love sex marriage parents and children the relationship between the family and the larger moral community and the influence of emerging technologies on the ethical issues inherent in family life The volume is intended to open up this exciting territory in applied ethics to those interested in philosophy family studies social work and to anyone who wants a deeper understanding of the ethical forces at work in this most basic social institution The Ethics of Canine Care Craig Banks Merow,2023-06-14 The social status of dogs has changed dramatically in the past 75 years Today most dog owners and small animal veterinarians consider companion canines to be members of their families and communities However the attitudes of some dog owners concerning their responsibilities to their dogs and many of the laws that regulate dog ownership and veterinary medical practice largely reflect the human canine relationship and ethical norms of an earlier era This incongruity leads to unmet needs for companion canines and high levels of stress for many veterinary clinicians This book presents arguments for human responsibilities to companion canines a detailed analysis of what those responsibilities entail and the professional ethical standards and laws needed to ensure that responsibilities are met A new moral framework the Custodial Property Framework is created for the care and medical treatment of companion canines and is grounded in a detailed analysis of the responsibilities of care generated by the relationship we have with our best friends The ^AOxford Handbook of Philosophy of Education Harvey Siegel,2009-10-30 The essays serve as an introduction to key issues in philosophy of education and advance the discussion of those issues in original and fruitful ways Distinguished philosophers address a broad range of philosophical questions concerning education the first cohort of outstanding general philosophers to do so in English in a generation A Moral Defense of Prostitution Rob Lovering,2021-07-09 Is prostitution immoral In this book Rob Lovering argues that it is not Offering a careful and thorough critique of the many twenty to be exact arguments for prostitution's immorality Lovering leaves no claim unchallenged Drawing on the relevant literature along with his own creative thinking Lovering offers a clear and reasoned moral defense of the world's oldest profession Lovering demonstrates convincingly on both consequentialist and nonconsequentialist grounds that there is nothing immoral about prostitution between consenting adults The legal implications of this view are also brought to bear on the current discourse

surrounding this controversial topic **The Philosophy of Sex** Raja Halwani, Jacob M. Held, Natasha McKeever, Alan Soble, 2022-02-28 With twenty five essays seven of which are new to the eighth edition this best selling volume examines the nature morality and social meanings of contemporary sexual phenomena Topics include sexual desire and activity masturbation Sexual orientation asexuality transgender issues Zoophilia rape casual sex and promiscuity love and sex polyamory sexual consent sexual perversion sexual ethics objectification BDSM sex and technology sex and race and sex work Updated and new discussion questions offer students starting points for debate in both the classroom and the bedroom

Ethics Arthur F. Holmes, 2009-08-20 Arthur Holmes addresses the questions What is good What is right How can we know In this second edition he also surveys a variety of approaches to ethics including cultural relativism emotivism ethical egoism and utilitarianism all with an acknowledgment of the new postmodern environment Biomedical Research and Beyond Christopher O. Tollefsen, 2008-04-30 text Biomedical Research and Beyond investigates the ethics of biomedical and scientific inquiry including embryonic research animal research genetic enhancement and fairness in research in the developing world Core concerns of biomedical and scientific research ethics are then shown also to be key in humanistic areas of inquiry *Making Sense of Affirmative Action* Kasper Lippert-Rasmussen, 2020-03-30 Kasper Lippert Rasmussen here poses the question Is affirmative action morally unjustifiable As a phrase that frequently surfaces in major headlines affirmative action is a highly controversial and far reaching issue yet most of the recent scholarly literature surrounding the topic tends to focus on defending one side or another in a particular case of affirmative action Lippert Rasmussen instead takes a wide angle view addressing each of the prevailing contemporary arguments for and against affirmative action In his introduction he proposes an amended definition of affirmative action and considers what forms from quotas to outreach strategies may fall under this revised definition He then analyzes the strengths and weaknesses of each position relative to each other and applies recent discussions in political philosophy to assess if and how each argument might justify different conclusions given different cases or philosophical frameworks Each chapter investigates an argument for or against affirmative action The six arguments for it consist of compensation anti discrimination equality of opportunity role model diversity and integration The five arguments against it are reverse discrimination stigma mismatch publicity and merit Lippert Rasmussen also expands the discussion to include affirmative action for groups beyond the prototypical examples of African Americans and women and to consider health and minority languages as possible criteria for inclusion in affirmative action initiatives Based on the comparative strength of anti discrimination and equality of opportunity arguments *Making Sense of Affirmative Action* ultimately makes a case in favor of affirmative action however its originality lies in Lippert Rasmussen's careful exploration of moral justifiability as a contextual evaluative measure and his insistence that complexity and a comparative focus are inherent to this important issue **What's Wrong?** David Boonin, Graham Oddie, 2010 What's Wrong Applied Ethicists and Their Critics is a thorough and engaging introduction to applied ethics that covers virtually all of

the issues in the field Featuring more than ninety five articles it addresses standard topics such as abortion euthanasia capital punishment world hunger and animal rights and also delves into cutting edge areas like cloning racial profiling same sex marriage prostitution and slave reparations The volume includes seminal essays by prominent philosophers Robert Nozick James Rachels Peter Singer and Judith Jarvis Thomson alongside work by newer voices in the field Employing a unique approach to teaching argumentation editors David Boonin and Graham Oddie unify the wealth of material presented in this collection Each chapter opens with a featured article that takes a strong stand on a particular issue the essays that immediately follow offer objections and critical responses to the arguments put forth in the featured selection This format helps students learn how to better engage in debates because it illustrates how philosophers argue with each other In addition a general introduction describes strategies for understanding and evaluating the different types of arguments contained in the readings while detailed chapter introductions enable students to see precisely how the arguments presented in the various writings are related to one another Discussion questions and suggestions for further reading are included for each chapter Ideal for courses in introduction to ethics and applied ethics contemporary moral problems What's Wrong can also be used in critical thinking courses that emphasize philosophical argumentation

Philosophy of Love, Sex, and Marriage Raja Halwani, 2018-01-29 How is love different from lust or infatuation Do love and marriage really go together like a horse and carriage Does sex have any necessary connection to either And how important are love sex and marriage to a well lived life In the Second Edition of this lively lucid and comprehensive book Raja Halwani explores and elucidates the nature uses and ethics of romantic love sexuality and marriage It is structured in three parts Love examines the nature of romantic love and how it differs from other types of love such as friendship and parental love It also investigates the relationship of love to morality and asks what limits morality puts on romantic love and even whether romantic love is inherently moral Sex demonstrates the difficulty in defining sex and the sexual and examines what constitutes good and bad sex in terms of pleasure naturalness and moral permissibility It discusses the nature of sexual desire and its connection to objectification and virtue all the while looking at specific sexual engagements such as pornography BDSM and raced desires Marriage traces the history of the institution and describes the various forms in which marriage exists and the reasons why people marry It also investigates the necessity of marriage and ways in which it requires reform Updates and Revisions in the Second Edition Expands the coverage of love and morality from one to two chapters incorporating much of the recent literature on love as a moral emotion Includes a new chapter on

sex and virtue ethics Ends each of the chapters on sex with an applied topic such as pornography BDSM prostitution racial sexual desires and adultery Increases coverage of the nature and purpose of marriage including debates surrounding same sex marriage but also moving beyond these debates to include issues on minimal marriage temporary marriage polygamy and other forms of marriage Updates the Further Reading and Study Questions sections at the end of each chapter and provides an up to date comprehensive bibliography at the back of the book Includes new discussions of topics on the nature of love love and reasons distinctions between two types of romantic love love and its connections to moral theories definitions of crucial sexual concepts objectification virtue and sex racial sexual desires and the definition of marriage and whether it is important as an institution

Ontological Arguments Graham Oppy, 2018-10-31 Ontological arguments are one of the main classes of arguments for the existence of God and have been influential from the Middle Ages right up until the present time This accessible volume offers a comprehensive survey and assessment of them starting with a sequence of chapters charting their history from Anselm and Aquinas via Descartes Leibniz Kant and Hegel to G del Plantinga Lewis and Tich This is followed by chapters on the most important topics to have emerged in the discussion of ontological arguments the relationship between conceivability and possibility the charge that ontological arguments beg the question and the nature of existence The volume as a whole shows clearly how these arguments emerged and developed how we should think about them and why they remain important today

Morals and Consent Malcolm Murray, 2017-09-27 How are we meant to behave And how are we to defend whatever answer we give *Morals and Consent* grounds our notion of morality in natural evolution and from that basis Malcolm Murray shows why contractarianism is a far more viable moral theory than is widely believed The scope of *Morals and Consent* has two main parts theory and application In his discussion of theory Murray defends contractarianism by appealing to evolutionary game theory and metaethical analyses His main argument is that we are not going to find morality as an objective fact in the world and that instead we can understand morality as a reciprocal cooperative trait From this minimal moral architecture Murray derives his innovative consent principle The application of the theory detailing what contractarians can or ought to say about moral matters takes up the greater portion of the work Murray offers a trenchant examination of what moral constraints we can claim concerning death abortion euthanasia and capital punishment sex pornography prostitution and sexual assault beneficence toward present and future people animals and the environment and liberty genetic enhancement organ sales and torture By focusing on evolutionary contractarianism and the epistemic justification of our moral claims or lack thereof Malcolm Murray's *Morals and Consent* is a serious advance in the field of applied ethics and fills an important void
