Zaterka, 2020-04-10 This book offers to the international reader a collection of original articles of some of the most skillful historians and philosophers of biology currently working in Latin American universities During the last decades increasing attention has been paid in Latin America to the history and philosophy of biology but since many local authors prefer to write in Spanish or in Portuguese their ideas have barely crossed the boundaries of the continent This volume aims to remedy this state of things providing a good sample of this production to the English speaking readers bringing together contributions from researchers working in Brazilian Argentinean Chilean Colombian and Mexican universities The stress on the regional provenance of the authors is not intended to suggest the existence of something like a Latin American history and philosophy of biology supposedly endowed with distinctive features On the contrary the editors firmly believe that advances in this field can be achieved only by stimulating the integration in the international debate Based on this assumption the book focuses on two topics life and evolution and presents a selection of contributions addressing issues such as the history of the concept of life the philosophical reflection on life manipulation and life extension the structure and development of evolutionary theory as well as human evolution *Life and Evolution Latin American Essays on the History and Philosophy of Biology* will provide the international reader with a rather complete picture of the ongoing research in the history and philosophy of biology in Latin America offering a snapshot of this dynamic community It will also contribute to contextualize and develop the debate concerning life and evolution and the relation between the two phenomena Science in Negotiation Jessica

Espey, 2022-11-28 This book explores the role of scientific evidence within United Nations UN deliberation by examining the negotiation of the Sustainable Development Goals SDGs endorsed by Member States in 2015 Using the SDGs as a case study this book addresses a key gap in our understanding of the role of evidence in contemporary international policy making It is structured around three overarching questions 1 how does scientific evidence influence multilateral policy development within the UN General Assembly 2 how did evidence shape the goals and targets that constitute the SDGs and 3 how did institutional arrangements and non state actor engagements mediate the evidence to policy process in the development of the SDGs The ultimate intention is to tease out lessons on global policy making and to understand the influence of different evidence inputs and institutional factors in shaping outcomes To understand the value afforded to scientific evidence within multilateral deliberation a conceptual framework is provided drawing upon literature from policy studies and political science including recent theories of evidence informed policy making and new institutionalism It posits that the success or failure of

evidence informing global political processes rests upon the representation and access of scientific stakeholders levels of community organisation the framing and presentation of evidence and time including the duration over which evidence and key conceptual ideas are presented Cutting across the discussion is the fundamental question of whose evidence counts and how expertise is defined The framework is tested with specific reference to three themes that were prominent during the SDG negotiation process public health articulated in SDG 3 urban sustainability articulated in SDG 11 and data and information systems which were a cross cutting theme of the dialogue Within each scientific communities had specific demands and through an exploration of key literature including evidence inputs and UN documentation as well as through key informant interviews the translation of these scientific ideas into policy priorities is uncovered The intended audiences of this book include academic practitioners studying evidence to policy processes multilateral negotiation and or UN policy planning The book also intends to provide useful insights for policy makers including UN diplomats officials and staff working to improve the quality of evidence communication and uptake within multilateral institutions Finally it aims to support the whole global academic and scientific community including students of public policy and political science by providing insights on how to input into influence and even shape international evidence informed policy making *Paper Belt on Fire* Michael Gibson,2022-11-29 Written by a successful venture capitalist and university dropout this book is part memoir part guide for the next generation of innovators who seek an alternative to the traditional path in higher education Part adventure tale part manifesto *Paper Belt on Fire* is a battle cry for anyone who ever dreamed of wresting power back from corrupt institutions or of nailing the truth to the cathedral door Peter Thiel author of *Zero to One* *Paper Belt on Fire* is the unlikely account of how two outsiders with no experience in finance a charter school principal and defrocked philosopher start a venture capital fund to short the higher education bubble Against the contempt of the education establishment they discover mentor and back the leading lights in the next generation of dropout innovators and in the end make their investors millions Can such a madcap strategy help renew American creativity Who would do such a thing This story is the behind the scenes romp of one team that threw educational authorities into a panic It fuses real life personal drama with history science and philosophy to show how higher education and other institutions must evolve to meet the dire challenges of tomorrow
