**Standard Methods for Thermal Comfort Assessment of Clothing** Ivana Špelić, Alka Mihelić-Bogdanić, Anica Hursa Šajatović, 2019-06-20 Providing detailed analysis of the thermal comfort assessment of clothing as the basis for developing standards this book discusses the thermal protective role of clothing as a way of modelling heat transfer from the body general thermal regulation of humans and the importance of globally accepted test methods and standards to improve quality New materials and discoveries in the study of thermal comfort necessitate the need for standard improvements and update The development of international standards and the unification of testing methods is of crucial significance to ensure cost reduction and health protection The book promotes instruments methods implementation of unified specifications and the definition of standards so that a clear quality management system can be established for both production systems and testing methods It discusses standards in ergonomics of the thermal environment clothing thermal characteristics and subjective assessment of thermal comfort which allows for systematic control of the measuring methods and the services and final products that are distributed on the global market This book is aimed at industry professionals researchers and advanced students working in textile and clothing engineering comfort testing and ergonomics Examination of Textiles with Mathematical and Physical Methods Andrea Ehrmann, Tomasz Blachowicz, 2016-11-10 This book presents basic knowledge on the examination of textile materials from fibers to yarns and knitted or woven fabrics using mathematical and physical methods Besides typical textile test procedures defined by well known standards the book aims at showing new ways to examine textile materials and giving an overview of the possibilities as well as problems occurring when methods from other areas are transferred into the examination of textiles The contents range from apparently simple measurements such as resistance of conductive coatings on woven fabrics to diffraction measurements on woven fabrics to optical examination of knitted fabrics by mathematical approaches to study yarn hairiness and cover factor Industrial Applications of Natural Fibres Jörg Müssig, 2010-04-15 Natural fibres are becoming increasingly popular for use in industrial applications providing sustainable solutions to support technical innovation These versatile natural based materials have applications in a wide range of industries from textiles and consumer products to the automotive and construction industries Industrial Applications of Natural Fibres examines the different steps of processing from natural generation fibre separation and fibre processing to the manufacturing of the final product Each step is linked to fibre properties and characterization highlighting how different fibres influence the product properties through a discussion of their chemical and structural qualities Considering the value added chain from natural generation to final product with emphasis on quality management this book reviews the current research and technical applications of natural fibres Topics covered include Introduction to the Chemistry and Biology of Natural Fibres Economic Aspects of Natural Fibres Vegetable Fibres Animal Fibres Testing and Quality Management Applications Current and Potential Industrial Application of Natural Fibres will be a valuable resource for scientists in

industry and academia interested in the development of natural based materials and products It is particularly relevant for those working in chemical engineering sustainable chemistry agricultural sciences biology and materials sciences

Surface Properties of Non-conventional Cellulose Fibres Majda Sfiligoj Smole, Silvo Hribernik, Manja Kurečič, Andreja Urbanek Krajnc, Tatjana Kreže, Karin Stana Kleinschek, 2019-02-15 The authors describe how sustainable textile fibers from crops such as quinoa grass hops corn and wheat stems etc have recently begun to generate great interest The structure property relationships of such non conventional cellulose fibers are studied in this brief as are their sorption and surface properties which are of primary importance A systematic review of each fiber s properties is given the emphasis is placed on the water sorption capacity the fiber s surface potential and fibrillation properties Textile Materials for Lightweight Constructions Chokri Cherif, 2015-08-11 In this book experts on textile technologies convey both general and specific information on various aspects of textile engineering ready made technologies and textile chemistry They describe the entire process chain from fiber materials to various yarn constructions 2D and 3D textile constructions preforms and interface layer design In addition the authors introduce testing methods shaping and simulation techniques for the characterization of and structural mechanics calculations on anisotropic pliable high performance textiles including specific examples from the fields of fiber plastic composites textile concrete and textile membranes Readers will also be familiarized with the potential offered by increasingly employed textile structures for instance in the fields of composite technology construction technology security technology and membrane technology **Textile-Based Advanced Materials** Thomas Bechtold, Avinash P. Manian, 2021-03-17 Developments in the science and technology of textiles are not only limited to apparel and fashion Certainly there are research efforts aimed at improving the construction and processing of textiles for clothing such as studies on cleaner production to reduce environmental impact increasing the utilization of fibers and process chemicals from renewable resources and on the recycling of materials from post consumer waste apparel back into the manufacturing of new clothing articles In addition technological concepts developed for the creation of clothing over the centuries are now being investigated for use in a diverse array of fields such as in the manufacture of engineering composites personal protective equipment and medicine Further developments in other fields such as electronics nanotechnology and information and communication technologies are being investigated for their incorporation into apparel and clothing to create smart textiles The aim of this Special Issue is to put together a collection of scientific reports on such efforts to highlight the range of scientific and technological issues that are being targeted and the ingenuity of the methodologies employed to find answers It is hoped that readers of this issue will come away with an appreciation of the research being conducted in this area and perhaps gain inspiration for their own scientific endeavors *Smart & Sustainable Infrastructure: Building a Greener Tomorrow* Nemkumar Banthia, Salman Soleimani-Dashtaki, Sidney Mindess, 2024-02-19 This book gathers peer reviewed contributions presented at the 1st Interdisciplinary Symposium on Smart Sustainable Infrastructure ISSSI held in Vancouver

BC Canada on September 4 8 2023 and affiliated with the 77th RILEM Annual Week 2023 Aiming at creating an environment of mutual cooperation between experts in materials and structures it covers topics such as sensors IoT and structural health monitoring AI and machine learning data analytics for infrastructure management nanotechnology additive manufacturing smart and bioinspired materials durability of materials and structures resilience to earthquakes floods fire and blast carbon reduction in construction and operations and sustainable ultra high performance materials The contributions which were selected through a rigorous international peer review process share exciting ideas that will spur novel research directions and foster new multidisciplinary collaborations

**Medical Textiles from Natural Resources** Md. Ibrahim H.

Mondal,2022-06-15 Medical Textiles from Natural Resources provides systematic and comprehensive coverage of the fundamentals production methods processing techniques characterization techniques properties and applications of medical textile materials from natural resources Medical textiles offer a variety of technical and functional properties valued in medical and healthcare sectors often relating to hygiene As medical textile products remain in close contact with the human body the fibre must have characteristics such as biological compatibility biological degradability permeability and nontoxicity Only materials from natural renewable sources have such characteristics This book provides the latest information on a wide range of medical applications from single suture and wound dressings to implants and tissue scaffolds It also offers a systematic review of the manufacture properties and applications of technical textiles for medical use Explains the latest technologies related to fibre extraction from natural sources chemical treatments weave constructions fabric finishes and coatings Describes innovative applications of nanomaterials in the treatment of textile fabric and the utilization of carbohydrate polymers in the preparation of nanoparticles deposited in nonwoven fabrics Helps product designers to find appropriate materials from natural resources with the characteristics of biodegradability renewability biocompatibility and nontoxicity

Geosynthetics: Leading the Way to a Resilient Planet Giovanni Biondi,Daniele Cazzuffi,Nicola Moraci,Claudio Soccodato,2023-09-15 This volume contains the proceedings of the 12th International Conference on Geosynthetics 12 ICG held in Roma Italy 17 21 September 2023 About 750 Authors Academics Researchers Students Practitioners Contractors and Manufacturers contributed to the peer reviewed papers of this volume which includes the Giroud lecture the Bathurst lecture the Rowe lecture four keynote lectures and 296 technical papers The content of these proceedings illustrates the sustainable use of geosynthetics in a variety of innovative as well as consolidated applications After the sustainability implications in the correct use of geosynthetics the ability to overcome the natural events effects often related to the climate change and to adequately afford the human activities as the increase of pollution forced to refer to a new keyword Resiliency The 12 ICG intends to become the base for the next step hence the conference theme is Geosynthetics Leading the Way to a Resilient Planet The conference topics through general and parallel sessions invited presentations and keynote lectures address the most recent developments in geosynthetic engineering and stimulate fruitful technical and scientific interaction among

academicians professionals manufacturers students The 12 ICG proceedings contain a wealth of information that could be useful for researchers practitioners and all those working in the broad innovative and dynamic field of geosynthetics

**Metrics for High-quality Specular Surfaces** Lionel R. Baker, 2004 This book supplies the optical component and systems designer and quality assurance engineers and managers with the definitions measurement principles and standard metrics used to characterize high quality specular surfaces The author covers both the traditional visual methods as well as newer but not necessarily better computer aided techniques and describes the metrics adopted by the new ISO standards including the setting of form and finish tolerances Key issues of industry are raised to help stimulate research and development of new methods and standards that blend the best of the old and new approaches to surface assessment

Quality Handbook for Composite Materials M.H. Geier, 1994-07-31 As the use of composite materials has become widespread in recent years quality control in their manufacture has become essential This book is the first compilation of the quality control methods used in industry and academia This is essentially a practical book accessible to anyone working in or wanting to know more about quality control in composite material manufacture

**Natural Polymers, Biopolymers, Biomaterials, and Their Composites, Blends, and IPNs** Sabu Thomas, Neethu Ninan, Sneha Mohan, Elizabeth Francis, 2012-07-18 Natural Polymers Biopolymers Biomaterials and Their Composites Blends and IPNs focuses on the recent advances in natural polymers biopolymers biomaterials and their composites blends and IPNs Biobased polymer blends and composites occupy a unique position in the dynamic world of new biomaterials The growing need for lubricious coatings

**Nanoscale Calibration Standards and Methods** Günter Wilkening, Ludger Koenders, 2005-07-01 The quantitative determination of the properties of micro and nanostructures is essential in research and development It is also a prerequisite in process control and quality assurance in industry The knowledge of the geometrical dimensions of structures in most cases is the base to which other physical and chemical properties are linked Quantitative measurements require reliable and stable instruments suitable measurement procedures as well as appropriate calibration artefacts and methods The seminar NanoScale 2004 6th Seminar on Quantitative Microscopy and 2nd Seminar on Nanoscale Calibration Standards and Methods at the National Metrology Institute Physikalisch Technische Bundesanstalt PTB Braunschweig Germany continues the series of seminars on Quantitative Microscopy The series stimulates the exchange of information between manufacturers of relevant hard and software and the users in science and industry Topics addressed in these proceedings are a the application of quantitative measurements and measurement problems in microelectronics microsystems technology nano quantum molecular electronics chemistry biology medicine environmental technology materials science surface processing b calibration correction methods calibration methods calibration standards calibration procedures traceable measurements standardization uncertainty of measurements c instrumentation and methods novel improved instruments and methods reproducible probe sample positioning position measuring systems novel improved probe detector systems linearization

methods image processing      **Particle Technology and Textiles** Jean Cornier, Franz Pursche, 2023-05-22 Functionalization of material systems is one of the key developments nowadays in the textile industry where particles are frequently used to enhance the properties of fibers and to add new functionalities This book focuses on innovative textile materials and is a perfect guide for professionals in the textile industry and scientists alike An overview of particle technology is provided before addressing all topics relevant to particle enhanced textiles i e the properties and application of micro nanoparticles in textiles production techniques safety as well as regulatory and intellectual property aspects The book covers the composition and applications of various types of textile fillers finishings and microfibers gives an outlook on future trends and challenges in the research development and production of nano and micro enabled textiles The authors of the book who are leading experts in their fields address many aspects relevant to the use of particle enhanced textiles in industrial applications as well as in our daily life A particular emphasis is put on practical examples of applications and products safety and sustainability issues and the potential for further innovation This book should bring inspiration for textile scientists in using particles for improving textiles and further expanding their possibilities of use      **Advances in Plasma Treatment of Textile Surfaces** Shahid Ul Islam, Aminoddin Haji, 2024-01-24 Advances in Plasma Treatment of Textile Surfaces offers a detailed overview on the use of plasma in natural and synthetic textiles and also explores recent applications in technical textiles including composites ballistic performance functionalization and textile wastewater treatment This promising technology can alter the surface properties of textiles without having a significant effect on their bulk properties leading to potential improvements to the scouring de sizing dyeing finishing printing and laminating processes among others Drawing on an international team of contributors from industry as well as academia this important book is bringing these innovative sustainable plasma treatments to textile and polymer scientists everywhere working in the field of textile functionalization Provides detailed technical descriptions of cutting edge applications of plasma in nanotechnology biotechnology and other fields Describes the different kinds of plasma treatment equipment and compares their use for different effects Starts with overviews of basic information such as how to determine surface properties      *Handbook of Composites from Renewable Materials, Functionalization* Vijay Kumar Thakur, Manju Kumari Thakur, Michael R. Kessler, 2017-02-03 This unique multidisciplinary 8 volume set focuses on the emerging issues concerning synthesis characterization design manufacturing and various other aspects of composite materials from renewable materials and provides a shared platform for both researcher and industry The Handbook of Composites from Renewable Materials comprises a set of 8 individual volumes that brings an interdisciplinary perspective to accomplish a more detailed understanding of the interplay between the synthesis structure characterization processing applications and performance of these advanced materials The Handbook comprises 169 chapters from world renowned experts covering a multitude of natural polymers reinforcement fillers and biodegradable materials Volume 4 is solely focused on the Functionalization of renewable materials Some of the important topics include

but not limited to Chitosan based bio sorbents oil spill clean up by textiles pyridine and bipyridine end functionalized polylactide functional separation membranes from chitin and chitosan derivatives acrylated epoxidized flaxseed oil bio resin and its biocomposites encapsulation of inorganic renewable nanofiller chitosan coating on textile fibers for functional properties surface functionalization of cellulose whiskers for nonpolar composites impact of chemical treatment and the manufacturing process on mechanical thermal and rheological properties of natural fibers based composites bio polymers modification review on fibers from natural resources strategies to improve the functionality of starch based films the effect of gamma radiation on biodegradability of natural fibers surface functionalization through vapor phase assisted surface polymerization VASP on natural materials from agricultural by products okra bast fiber as potential reinforcement element of biocomposites silane coupling agent used in natural fiber plastic composites composites of olefin polymer natural fibers the surface modifications on natural fibers surface functionalization of biomaterials thermal and mechanical behaviors of bio renewable fibres based polymer composites natural and artificial diversification of starch role of radiation and surface modification on bio fiber for reinforced polymer composites

#### Corporate Social Responsibility and Corporate Change

Arnaud Sales, 2019-05-10 This wide ranging book examines the new dynamics of corporate social responsibility CSR and the impact they have had on the transformation of business corporations Written by an international group of distinguished experts in management and organization studies economics and sociology the book leads one to theoretically and practically rethink CSR a movement that has developed into a strong and rich institutional domain since the mid 1990s Through 14 chapters the book shows the complexity diversity and progression of the institutional work performed by a large number of individual and organizational actors in specialized networks to develop this strategic field Central to this book are the core issues associated with the field of CSR recent advances in the development dissemination and implementation of public and private standards of social responsibility the pressing challenges of developing sustainable strategies of value creation in the face of global warming and underdevelopment and finally examples of how CSR has been implemented and institutionalized within business organizations with special attention to the role played by a variety of social actors in organizational change Conceived as a movement corporate social responsibility spearheads a transformation project challenging traditional and outmoded forms of corporate governance that frequently pose troublesome ethical issues From this standpoint Corporate Social Responsibility and Corporate Change will serve as a reference point for academics researchers managers and practitioners

**Automotive Production Systems and Standardisation** Constanze Clarke, 2006-03-30 In January 2000 Mercedes Benz started to implement the Mercedes Benz Production System MPS throughout its world wide passenger car plants This event is exemplary of a trend within the

automotive industry the creation and introduction of company specific standardised production systems It gradually emerged with the introduction of the Chrysler Operating System COS in the mid 1990s and represents a distinct step in the process towards implementing the universal principles of lean thinking as propagated by the MIT study For the academic field of industrial sociology and labour policy the emergence of this trend seems to mark a new stage in the evolution of the debate about production systems in the automotive industry J rgens 2002 2 particularly as it seems to undermine the stand of the critics of the one best way model Boyer and Freyssenet 1995 The introduction of company level standardised production systems marks the starting point of the present study At the core of it is a case study about the Mercedes Benz Production System MPS
