A promotional poster for the TV show 'StarTalk'. Neil deGrasse Tyson is shown from the chest up, wearing a blue suit and tie, with his hands raised in a gesture of surprise or excitement. He is positioned in the center of a dark, swirling tunnel that leads into space. The background is a deep black space filled with stars, planets, and various space-related objects. To the top left, a space shuttle is shown in flight. To the top right, the planet Saturn is prominent. Other objects include a vintage microphone, a pair of orange gloves, a pair of red glasses, a small satellite, and a skull. The overall theme is a blend of science and pop culture.

The Oxford Handbook of Persian Linguistics Anousha Sedighi, Pouneh Shabani-Jadidi, 2018-08-02 This handbook offers a comprehensive overview of the field of Persian linguistics

discusses its development and captures critical accounts of cutting edge research within its major subfields as well as outlining current debates and suggesting productive lines of future research. Leading scholars in the major subfields of Persian linguistics examine a range of topics split into six thematic parts. Following a detailed introduction from the editors, the volume begins by placing Persian in its historical and typological context in Part I. Chapters in Part II examine topics relating to phonetics and phonology while Part III looks at approaches to and features of Persian syntax. The fourth part of the volume explores morphology and lexicography as well as the work of the Academy of Persian Language and Literature. Part V language and people covers topics such as language contact and teaching Persian as a foreign language while the final part examines psycho neuro and computational linguistics. The volume will be an essential resource for all scholars with an interest in Persian language and linguistics.

The Roman Mithras Cult Olympia Panagiotidou, Roger Beck, 2017-11-02. The Roman Mithras Cult: A Cognitive Approach is the first full cognitive history of an ancient religion. In this groundbreaking book on one of the most intriguing and mysterious ancient religions, Roger Beck and Olympia Panagiotidou show how cognitive historiography can supplement our historical knowledge and deepen our understanding of past cultural phenomenon. The cult of the sun god Mithras, which spread widely across the Greco-Roman world at the same time as other mystery cults and Christianity, offered to its devotees certain images and assumptions about reality. Initiation into the mysteries of Mithras and participation in the life of the cult significantly affected and transformed the ways in which the initiated perceived themselves, the world, and their position within it. The cult's major ideas were conveyed mainly through its major symbolic complexes. The ancient written testimonies and other records are not adequate to establish a definitive reconstruction of Mithraic theologies and the meaning of its complex symbolic structures. Filling this gap, *The Roman Mithras Cult: A Cognitive Approach* identifies the cognitive and psychological processes which took place in the minds and bodies of the Mithraists during their initiation and participation in the mysteries, enabling the perception, apprehension, and integration of the essential images and assumptions of the cult in its worldview system.

Foreign Language Education in America Steven Berbeco, 2016-04-08. Foreign language teaching in America today falls into three distinct fields of influence and interest: public and private schools, college and other post-secondary programs, and courses for adult learners. At a time when academics and instructors in each of these fields seek to answer similar questions, too few published resources recognize and address the parallels among them. In response, *Foreign Language Education in America* is an edited book with contributions that represent the diversity in foreign language education today, including perspectives from elementary, middle schools, high schools, university level courses, summer programs, federal government, and international learning. This is a practical guide to the state of the field that fills a much needed gap for scholars, researchers, administrators, and practitioners who are looking for a resource that describes effective practices across the field.

Science Education in Theory and Practice Ben Akpan, Teresa J. Kennedy, 2020-09-08. This book provides a collection of applicable learning theories and their applications to science teaching.

It presents a synthesis of historical theories while also providing practical implications for improvement of pedagogical practices aimed at advancing the field into the future. The theoretical viewpoints included in this volume span cognitive and social human development, address theories of learning, and describe approaches to teaching and curriculum development. The book presents and discusses humanistic, behaviourist, cognitivist, and constructivist theories. In addition, it looks at other theories such as multiple intelligences theory, systems thinking, gender sexuality theory, and indigenous knowledge systems. Each chapter follows a reader motivated approach anchored on a narrative genre. The book serves as a guide for those aiming to create optional learning experiences to prepare the next generation STEM workforce. Chapter: The Bildung Theory From von Humboldt to Klafki and Beyond is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com. Bridges to Recovery Jo-ann Krestan, 2000-03-15. This book will be an asset to teachers and students in clinical social work, psychology, and substance abuse counseling programs. **BOOK JACKET** **Focus On: 100 Most Popular 21st-century English Actresses** Wikipedia contributors, *Innovative Strategies for Heritage Language Teaching* Marta Fairclough, Sara M. Beaudrie, 2016. Heritage language (HL) learning and teaching presents particularly difficult challenges. Melding cutting edge research with innovations in teaching practice, the contributors in this volume provide practical knowledge and tools that introduce new solutions informed by linguistic, sociolinguistic, and educational research on heritage learners. Scholars address new perspectives and orientations on designing HL programs, assessing progress and proficiency, transferring research knowledge into classroom practice, and the essential question of how to define a heritage learner. Articles offer analysis and answers on multiple languages, and the result is a unique and essential text, the only comprehensive guide for heritage language learning based on the latest theory and research, with suggestions for the classroom. **Strange Stars** Jason Heller, 2018-06-05. A Hugo Award winning author and music journalist explores the weird and wild story of when rock n roll met the sci fi world of the 1970s. As the 1960s drew to a close, and mankind trained its telescopes on other worlds, old conventions gave way to a new kind of hedonistic freedom that celebrated sex, drugs, and rock n roll. Derided as nerdy or dismissed as fluff, science fiction rarely gets credit for its catalyzing effect on this revolution. In *Strange Stars*, Jason Heller recasts sci fi and pop music as parallel cultural forces that depended on one another to expand the horizons of books, music, and out of this world imagery. In doing so, he presents a whole generation of revered musicians as the sci fi obsessed conjurers they really were: from Sun Ra lecturing on the black man in the cosmos to Pink Floyd jamming live over the broadcast of the Apollo 11 moon landing; from a wave of Star Wars disco chart toppers and synthesiser wielding post-punks to Jimi Hendrix distilling the purplish haze he discovered in a pulp novel into psychedelic song. Of course, the whole scene was led by David Bowie, who hid in the balcony of a movie theater to watch *2001: A Space Odyssey* and came out a changed man. If today's culture of Comic Con fanatics, superhero blockbusters, and classic sci fi reboots has us thinking that the nerds have won at last, *Strange Stars* brings to life an era of unparalleled and unearthly creativity in magazines, novels,

films records and concerts to point out that the nerds have been winning all along
