Starting Out With Java Programming Challenges Solutions:

Starting Out with Java, Alternate Edition Tony Gaddis, 2004 **Programming Challenges** Steven S Skiena, Miguel A. Revilla, 2006-04-18 There are many distinct pleasures associated with computer programming Craftsmanship has its quiet rewards the satisfaction that comes from building a useful object and making it work Excitement arrives with the flash of insight that cracks a previously intractable problem The spiritual quest for elegance can turn the hacker into an artist There are pleasures in parsimony in squeezing the last drop of performance out of clever algorithms and tight coding The games puzzles and challenges of problems from international programming competitions are a great way to experience these pleasures while improving your algorithmic and coding skills This book contains over 100 problems that have appeared in previous programming contests along with discussions of the theory and ideas necessary to attack them Instant online grading for all of these problems is available from two WWW robot judging sites Combining this book with a judge gives an exciting new way to challenge and improve your programming skills This book can be used for self study for teaching innovative courses in algorithms and programming and in training for international competition The problems in this book have been selected from over 1 000 programming problems at the Universidad de Valladolid online judge The judge has ruled on well over one million submissions from 27 000 registered users around the world to date We have taken only the best of the best the most fun exciting and interesting problems available

Problems & Solutions in Scientific Computing Willi-Hans Steeb, 2004 Scientific computing is a collection of tools techniques and theories required to develop and solve mathematical models in science and engineering on a computer This timely book provides the various skills and techniques needed in scientific computing The topics range in difficulty from elementary to advanced and all the latest fields in scientific computing are covered such as matrices numerical analysis neural networks genetic algorithms etc Presented in the format of problems and detailed solutions important concepts and techniques are introduced and developed Many problems include software simulations Algorithms have detailed implementations in C or Java This book will prove to be invaluable not only to students and research workers in the fields of scientific computing but also to teachers of this subject who will find this text useful as a supplement The topics discussed in this book are part of the e learning and distance learning courses conducted by the International School of Scientific Computing South Africa
