

WINDOWS 8.1 UPDATE QUICK REFERENCE GUIDE

If your PC is currently running Windows 8 or Windows RT, it's free to update to Windows 8.1 or Windows RT 8.1. And unlike previous updates to Windows, you'll get this update from the Windows Store.

1. Before you begin

The system requirements for Windows 8.1 and Windows RT 8.1 are nearly the same as the requirements for Windows 8—if your PC is already running Windows 8 (or Windows RT), in most cases, you can get the free update to Windows 8.1 (or Windows RT 8.1).

But before you begin, here are some things to keep in mind.

- Your files, desktop apps, user accounts, and settings come with you. Windows 8.1 and Windows RT 8.1 come with some new built-in apps, and it will update or replace some of your existing built-in apps. Your existing Windows Store apps don't come with you, but once the update is complete, you can reinstall all of these apps at once—or just the ones you want. For more info, see the Welcome to the new Windows section of this page.
- We'll check your desktop apps and devices for you. As part of the update, we check your current desktop apps and connected devices, and let you know what you'll need to do to get them ready for the update, or to get them working again after the update. In most cases, you won't need to do anything—most desktop apps, devices (like printers), and network connections will work normally after the update. If you have particular desktop apps or devices you're concerned about, you can check their compatibility in the Windows Compatibility Center.
- Consider using a Microsoft account to sign in to your PC. If you already use a Microsoft account to sign in to Windows 8 or Windows RT, you'll use that same account to sign in to Windows 8.1 or Windows RT 8.1.
- If you don't, we recommend that you start using a Microsoft account in Windows 8.1 or Windows RT 8.1. Simply put, it's the glue that holds together so many useful features of the new Windows: the ability to download apps from the Store, automatic syncing of your settings and documents between your PCs, backing up your photos to the cloud so you can get to them from anywhere, and seeing all your contacts from multiple email and social networking accounts together in the People and Mail apps.
- If you already have an account you use with Outlook.com, Xbox LIVE, Windows Phone, or Skype, then you already have a Microsoft account. If you use more than one of these, we can help you figure out which email address to use.
- You can keep working while the update is installing. Download and installation times vary from about 30 minutes to several hours, depending on your Internet connection speed, and the speed and configuration of your PC, but you can still use your PC while the update is installing in the background. During this time, if you decide to leave your PC unattended, be sure to save your work and close any apps you have open first, in case your PC needs to restart automatically while you're away. After it restarts, you won't be able to use your PC for a little while (from about 20 minutes to an hour), while the updates are being applied. After that phase is complete, we'll walk you through choosing a few basic settings and then Windows will finish applying any final updates that are needed.

PREPARE YOUR PC

There are a few things you should do before you start installing.

- Back up your files. Although your files and apps come with you when you update to Windows 8.1 or Windows RT 8.1, it's a good idea to make sure that your files are backed up first by setting up File History.
- Make sure you have enough free disk space. If you're currently running Windows 8, you need 3,080 MB of available space to install the 32-bit version of Windows 8.1, and 3,850 MB of available space to install the 64-bit version of Windows 8.1. On a Windows RT device, you need 2,250 MB of available disk space to install Windows RT 8.1. For more info, see Tips to free up drive space on your PC.
