2 1 Text Summarization Text summarization is the process of distilling the most important information from a source or sources to produce an abridged version for a particular user or users and task or tasks 3 Basic and classical articles in text summarization appear in *Advances in automatic text summarization* 3 A literature survey on information extraction and text summarization is given by Zechner 7 In general the process of automatic text summarization is divided into three stages 1 analysis of the given text 2 summarization of the text 3 presentation of the summary in a suitable output form Titles abstracts and keywords are the most common summaries in Academic papers Usually the title the abstract and the keywords are the first second and third parts of an Academic paper respectively The title usually describes the main issue discussed in the study and the abstract presents the reader a short description of the background the study and its results A keyword is either a single word unigram e g learning or a collocation which means a group of two or more words representing an important concept e g machine learning natural language processing Retrieving collocations from text was examined by Smadja 5 and automatic extraction of collocations was examined by Kita et al 1

Troubleshooting Manufacturing Processes LaRoux K. Gillespie, 1988 *Green Materials and Advanced Manufacturing Technology* Samson Jerold Samuel Chelladurai, Suresh Mayilswamy, Arun Seeralan Balakrishnan, S. Gnanasekaran, 2020-12-29 This book includes

recent theoretical and practical advancements in green composite materials and advanced manufacturing technology. It provides important original and theoretical experimental results which use nonroutine technologies often unfamiliar to some readers and covers novel applications of more familiar experimental techniques and analyses of composite problems. Green Materials and Advanced Manufacturing Technology: Concepts and Applications provides insight and a better understanding into the development of green composite materials and advanced manufacturing technology used in various manufacturing sectors. It highlights recent trends in the fields of green composites, metal matrix composites, ceramic matrix composites, surface modification using laser cladding, types of dust collectors in waste management and recycling in industries, machinability studies of metals and composites using surface grinding, drilling, electrical discharge machining, joining of metals using friction stir welding, shielded metal arc welding and linear friction welding. This book is written for engineering students, postgraduate students, research scholars, faculty members and industry professionals who are engaged in green composite materials and development of advanced manufacturing technology. **Proceedings Of 17th All India**

Bhattacharyya, J. Paulo Davim, 2017-03-07 This book presents a complete coverage of micromachining processes from their basic material removal phenomena to past and recent research carried by a number of researchers worldwide. Chapters on effective utilization of material resources, improved efficiency, reliability, durability and cost effectiveness of the products are presented. This book provides the reader with new and recent developments in the field of micromachining and

completely updated volume covers the design, manufacturing and inspection of high productivity drilling tools (HPDT) and addresses common issues with drilling system components. It discards old notions and beliefs as it introduces scientifically and technically sound concepts and rules with detailed explanations and multiple practical examples. High Productivity Drilling Tools: Design and Geometry introduces the development of the concept of high productivity HP drill design and its manufacturing and application features. This book continues to develop the concept of a drilling system in the new edition and includes new practical examples. It explains how to properly design and manufacture drilling tools for a specific application and includes a detailed explanation of the design features, tool manufacturing and implementation practices, metrology of drilling and drilling tools and the tool failure analysis. Using the coherency law as the guidelines introduced in the first edition, the new edition shows how to formulate the requirements for the components of the drilling system, pointing out that the drilling tool is the key component to be improved. This practical book should be on the shelves of all industrial

engineers those working in production and manufacturing process designers tool material designers cutting tool designers and quality specialists Researchers senior undergraduate students and graduate students will also find this book full of very helpful reference information This book is also available as a set Drills High Productivity Drilling Tools 2 Volume Set
