Advances in Electrical and Computer Technologies Thangaprakash Sengodan, Sanjay Misra, Murugappan M,2025-07-04 This book comprises a selection of papers presented at the Sixth International Conference on Advances in Electrical and Computer Technologies ICAECT 2024 It compiles groundbreaking research and advancements in the field of electrical engineering electronics engineering computer engineering and communication technologies The book touches upon a wide array of topics including smart grids soft computing techniques in power systems smart energy management systems and power electronics under the Electrical Engineering track and biomedical engineering antennas and waveguides image and signal processing and broad band and

mobile communication under the Electronics Engineering track With special emphasis on Computer Engineering this book highlights emerging trends in computer vision pattern recognition cloud computing pervasive computing intelligent systems artificial intelligence neural network and fuzzy logic machine learning deep learning data science video processing and wireless communication This is a valuable resource for students researchers and engineers within the field of innovative research and practical applications of electrical and computer technologies

Fundamentals of Computer Networks

Matthew N. O. Sadiku, Cajetan M. Akujuobi, 2022-08-29 This textbook presents computer networks to electrical and computer engineering students in a manner that is clearer more interesting and easier to understand than other texts All principles are presented in a lucid logical step by step manner As much as possible the authors avoid wordiness and giving too much detail that could hide concepts and impede overall understanding of the material Ten review questions in the form of multiple choice objective items are provided at the end of each chapter with answers The review questions are intended to cover the little tricks which the examples and end of chapter problems may not cover They serve as a self test device and help students determine how well they have mastered the chapter

Mobile and Wireless Communications with Practical Use-Case Scenarios Ramona Trestian, 2022-12-22 The growing popularity of advanced multimedia rich applications along with the increasing affordability of high end smart mobile devices has led to a massive growth in mobile data traffic that puts significant pressure on the underlying network technology However no single network technology will be equipped to deal with this explosion of mobile data traffic While wireless technologies had a spectacular evolution over the past years the present trend is to adopt a global heterogeneous network of shared standards that enables the provisioning of quality of service and quality of experience to the end user To this end enabling technologies like machine learning Internet of Things and digital twins are seen as promising solutions for next generation networks that will enable an intelligent adaptive interconnected environment with support for prediction and decision making so that the heterogeneous applications and users requirements can be highly satisfied The aim of this textbook is to provide the readers with a comprehensive technical foundation of the mobile communication systems and wireless network design and operations and applications of various radio access technologies Additionally it also introduces the reader to the latest advancements in technologies in terms of Internet of Things ecosystems machine learning and digital twins for IoT enabled intelligent environments Furthermore this textbook also includes practical use case scenarios using Altair WinProp Software as well as Python TensorFlow and Jupyter as support for practice based laboratory sessions

Cellular Communications Systems in Congested Environments Mo Ghorbanzadeh, Ahmed Abdelhadi, Charles Clancy, 2016-10-11 This book presents a mathematical treatment of the radio resource allocation of modern cellular communications systems in contested environments It focuses on fulfilling the quality of service requirements of the living applications on the user devices which leverage the cellular system and with attention to elevating the users quality of experience The authors also address the congestion of the spectrum by allowing sharing with

the band incumbents while providing with a quality of service minded resource allocation in the network The content is of particular interest to telecommunications scheduler experts in industry communications applications academia and graduate students whose paramount research deals with resource allocation and quality of service

Consumer Electronics: Bali, S. P.,2007 Consumer Electronics is the first book of its kind and comprehensively covers the theory applications and maintenance of various audio video systems telecommunication systems and electronic home office appliances The book completely covers the

Cyber Security for Next-Generation Computing Technologies Inam Ullah Khan,Mariya Ouaisa,Mariyam Ouaisa,Zakaria Abou El Houda,Muhammad Fazal Ijaz,2024-01-16 This book sheds light on the cyber security challenges associated with nextgeneration computing technologies emphasizing the serious threats posed to individuals businesses and nations With everything becoming increasingly interconnected via the Internet data security becomes paramount As technology advances people need to secure their data communication processes Personal data security including data integrity and confidentiality is particularly vulnerable Therefore the concept of cyber security forensics emerges to ensure data security for everyone addressing issues such as data control hijacking and threats to personal devices such as mobile phones laptops and other smart technologies This book covers key topics related to cyber security in next generation computing technologies ultimately enhancing the quality of life for citizens facilitating interaction with smart governments and promoting secure communication processes

KEY FEATURES Highlights innovative principles and practices using next generation computing technologies based cybersecurity Presents an introduction to recent trends regarding the convergence of AI ML in cybersecurity Offers an overview of theoretical practical simulation concepts of cybersecurity

Optimising IoT Networks Suvarna Patil,Manisha Bhende,Swati Sharma,2025-06-24 With a specific focus on energy efficiency Optimizing IoT Networks examines the application of machine learning to enhance resource allocations in IoT networks It discusses various algorithms including neural networks and reinforcement learning to optimise resource use and improve network performance It addresses challenges such as the dynamic behaviour of IoT devices and the need for real time decision making It discusses optimisation methods used alongside machine learning to enhance resource allocation efficiency Provides a foundational understanding of IoT network architecture and the importance of efficient resource allocation Discusses complexities in resource allocation due to dynamic device behaviour and varying data traffic patterns Covers key machine learning concepts and algorithms relevant to optimising resource allocation in IoT networks Emphasises the significance of energy efficiency in IoT networks and its impact on resource allocation strategies Explores algorithms such as clustering regression and reinforcement learning for effective resource allocation The book is designed for researchers practitioners and scholars in computer science and technology who are interested in or actively working on optimising IoT networks

The Industrial Information Technology Handbook Richard Zurawski,2018-10-03 The Industrial Information Technology Handbook focuses on existing and emerging industrial applications of IT and on evolving

trends that are driven by the needs of companies and by industry led consortia and organizations Emphasizing fast growing areas that have major impacts on industrial automation and enterprise integration the Handbook covers topics such as industrial communication technology sensors and embedded systems The book is organized into two parts Part 1 presents material covering new and quickly evolving aspects of IT Part 2 introduces cutting edge areas of industrial IT The Handbook presents material in the form of tutorials surveys and technology overviews combining fundamentals and advanced issues with articles grouped into sections for a cohesive and comprehensive presentation The text contains 112 contributed reports by industry experts from government companies at the forefront of development and some of the most renowned academic and research institutions worldwide Several of the reports on recent developments actual deployments and trends cover subject matter presented to the public for the first time
