Black Sea and Caucasus M. Sosson, R.A. Stephenson, S.A. Adamia, 2017-10-06 The fifteen chapters included in this volume are concerned with the main issues in the Eastern Black sea and Caucasus regions of the Alpine Tethyan orogenic realm which are 1 the changes in space and time of geodynamic processes responsible for the closure of the northern branch of the Neotethys Ocean and how these changes are related to the opening and inversion of back arc basins 2 the northwestern terminus of the Eastern Black sea rift 3 timing and evolution of inverted and foreland basins 4 the continuity of structures and their evolution in time between the Eastern Black Sea the Greater Caucasus the Lesser Caucasus and those of the Taurides Anatolides Pontides belt and of NW Iran and 5 Paratethys evolution since the Eocene in this belt The papers included in this volume present new results obtained mostly by projects supported by the DARIUS programme Collision and Collapse at the Africa-Arabia-Eurasia Subduction Zone \ Douwe J. J. van Hinsbergen, Michael A. Edwards, Rob Govers, 2009 The Mediterranean and northern Arabian regions provide a unique natural laboratory to constrain geodynamics associated with arc-continent and continent-continent collision and subsequent orogenic collapse by analysing regional and temporal distributions of the various elements in the geological archive This book combines thirteen new contributions that highlight timing and distribution of the Cretaceous to Recent evolution of the Calabrian Carpathian Aegean and Anatolian segments of the Africa Arabia Eurasia subduction zone These are subdivided into five papers documenting the timing and

kinematics of Cretaceous arc continent collision and Eocene and Miocene continent-continent collision in Anatolia with westward extrusion of Anatolia as a result. Eight papers provide an overview and new data from stratigraphy, structure, metamorphism, and magmatism covering the geological consequences of the largely Neogene collapse that characterizes the segments of interest in response to late stage reorganization of the subduction zone and the roll back and break off of segments of the subducting slab.

Secret Teachings of All Ages Manly Palmer Hall, 2005-02-09 Manly Palmer Hall wrote this book at age twenty one and self published it later in his mid twenties. The book is pure conceptual truth without bogging ourselves down with the details. Great read for anyone who likes Joseph Campbell and wishes to follow up on the Power of Myth and get into the right hand occult.

Porphyry in Syriac Yuri Arzhanov, 2024-07-01

In 2021 a previously unknown treatise by Porphyry of Tyre which has been preserved in a Syriac translation was made available to historians of philosophy. Porphyry On Principles and Matter De Gruyter 2021. This text not only enlarges our knowledge of the legacy of the most prominent disciple of Plotinus but also serves as an important witness to Platonist discussions of first principles and of Plato's concept of prime matter in the *Timaeus*. The aim of the present volume of collected studies is two fold. On the one hand it brings up an update to the state of the art of our knowledge of Porphyry's philosophy and of his role in the transmission of the earlier philosophical materials, especially those of the Middle Platonic works. On the other hand it focuses on the questions of the reception of Porphyry's legacy both by Greek and Latin Platonists with special interest in Calcidius and by Christian Oriental authors with particular focus on the Syriac tradition. The primary audience of the book will be scholars and graduate students in ancient and late ancient Greek philosophy. Orientalists and scholars interested in the Christian reception of Greek philosophy in the studies of the Christian Orient as well as in Greek, Latin, and Syriac philology.
