

- **Warp propulsion systems status display.** This wall display incorporates a schematic of the warp propulsion system and shows performance of all key system elements.

- **Impulse propulsion systems status display.** This wall display incorporates a schematic of the impulse propulsion system and shows performance of all key system elements.

- **Master situation monitor.** This large wall display features a variety of the starship, showing the location of key systems and hardware, highlighting any elements that are currently experiencing any condition out of normal. This display also incorporates two sets of user controls to permit use of this station for troubleshooting.

- **Chief Engineer's office.** This control room includes smaller scale replica versions of mainstay displays in Main Engineering, as well as workstations for the Chief Engineer and two assistants. It also includes emergency control stations, with the primary nuclear control consoles for Main Engineering. This office is located immediately adjacent to the matter/antimatter reaction assembly. A reinforced optical window permits the Chief Engineer to directly observe the matter reaction patterns within the core without the need for sensor display.

- **Duty engineer's console.** Adjacent to the Chief

Engineer's office is a smaller workstation available for use of the duty engineer. This console incorporates the systems display replica panels.

This facility is located immediately adjacent to the matter/antimatter reaction chamber. For safety reasons, two sets of isolation doors are available to protect the Main Engineering staff in case of serious malfunction or planned breach. These isolation doors can be triggered automatically. Further protection is provided by a system of containment berthing, which can be activated in the event of a warp core breach or similar contingency (See: 5.1.1).

The tablet-like master systems display console in the aft part of Main Engineering is actually the same unit, retooled to be used by Admiral Cartwright and company in *Star Trek: Command* in the movie *Star Trek VI*. The display was later Star Trek production staffers have taken it over, referring to it as "the pool table."

4.0 COMPUTER SYSTEMS

4.1 COMPUTER SYSTEM

The main computer system of the Enterprise is probably the most important single operational element of the starship, next to the crew. The computer is directly analogous to the autonomic nervous system of a living being, and is responsible in some way for the operation of virtually every other system of the vessel.

Crew interface for the main computer is provided by the Library Computer Access and Retrieval System software, usually abbreviated as LCARS. LCARS provides both key-based and verbal interface ability, incorporating highly sophisticated artificial intelligence routines, and graphic display organization for maximum crew ease-of-use. (See: 3.3).

COMPUTER CORES

The heart of the main computer system is a set of three redundant main processing cores. Any of these three cores is able to handle the primary operations computing load of the entire vessel. Two of these cores are located near the center of the Primary Hull between Decks 5 and 14, while the third is located between Decks 30 and 31 in the Engineering Hull. Each main core incorporates a series of miniature subatomic field generators, which creates a symmetrical (nonrepulsive) field distortion of 3000 millihertz, within the faster-than-light (FTL) core elements. This permits the transmission and

processing of optical data within the core at rates significantly exceeding light-speed.

The two main cores in the Primary Hull not in parallel clock speed with each other, providing 100% redundancy. In the event of any failure in either core, the other core is able to instantly assume the total primary computing load for the ship with no interruption, although some secondary and noncritical functions (such as holodeck simulations) may be suspended. The third core, located in the Engineering Hull, serves as a backup to the first two, and also serves the Battle Section during separated flight operations.

Core elements are based on FTL nanoprocesor units arranged into optical transverse clusters of 1,024 segments. In turn, clusters are grouped into processing modules composed of 256 clusters controlled by a bank of subatomic chips. Each core comprises seven primary and three upper levels, each level containing an average of four modules.

CORE MEMORY

Memory storage for main core usage is provided by 2,048 dedicated modules of 144 full-size optical storage chips under LCARS software control. These modules provide average dynamic access to memory at 4,000 kilobytes/sec. Total storage capacity of each module is about 600,000 kilobytes, depending on software configuration.

set off an anti matter bomb **Star Trek as Myth** Matthew Wilhelm Kapell,2010-03-16 In the past the examination of myth has traditionally been the study of the Primitive or the Other More recently myth has been increasingly employed in movies and in television productions Nowhere is this more apparent than in the Star Trek television and movie franchise This collection of essays on Star Trek brings together perspectives from scholars in fields including film anthropology history American studies and biblical scholarship Together the essays examine the symbolism religious implications heroic and gender archetypes and lasting effects of the Star Trek mythscape **Letters of the Century** Lisa Grunwald,Stephen J. Adler,2008-04-08 Immediate and evocative letters witness and fasten history catching events as they happen write Lisa Grunwald and Stephen J Adler in their introduction to this remarkable book In more than 400 letters from both famous figures and ordinary citizens Letters of the Century encapsulates the people and places events and trends that shaped our nation during the last 100 years Here is Mark Twain s hilarious letter of complaint to the head of Western Union an ecstatic letter from a young Charlie Chaplin upon receiving his first movie contract Einstein s letter to Franklin Roosevelt warning about atomic warfare Mark Rudd s generation gap letter to the president of Columbia University during the student riots of the 60s and a letter from young Bill Gates imploring hobbyists not to share software so that innovators can make some money In these pages our century s most celebrated figures become everyday people and everyday people become part of history Here is a veteran s wrenching letter left at the Vietnam Wall a poignant correspondence between two women trying to become mothers a heart breaking letter from an AIDS sufferer telling his parents how he wants to be buried an indignant e mail from a PC user to his on line server Letters write Grunwald and Adler give history a voice Arranged chronologically by decade illustrated with over 100 photographs Letters of the Century creates an extraordinary chronicle of our history through the voices of the men and women who have lived its greatest moments The Daily Writer Fred White,2008-09-26 Make Writing a Part of Your Daily Routine It isn t always easy to carve out time to devote meaningful thought and energy to your writing Hectic schedules distractions and creative blocks all too often interrupt the dream postpone it for another day But with 366 provocative entries each addressing a specific facet of the writing craft and accompanied by an in depth reflection and a stimulating exercise The Daily Writer provides you with easy entry points into that elusive space where words matter most and helps you to embrace writing as a way of seeing the world Whether you re looking for a way to better integrate writing into your life get warmed up before you dive into a bigger work in progress or overcome an old case of writer s block The Daily Writer can help you establish and maintain an inspired devotion to the craft *Fake Physics: Spoofs, Hoaxes and Fictitious Science* Andrew May,2019-04-12 People are used to seeing fake physics in science fiction concepts like faster than light travel antigravity and time travel to name a few The fiction label ought to be a giveaway but some SF writers especially those with a background in professional science are so adept at technobabble that it can be difficult to work out what is fake and what is real To confuse matters further Isaac Asimov s 1948 piece about the fictitious

time travelling substance thiotimoline was written not as a short story but in the form of a spoof research paper The boundaries between fact and fiction can also be blurred by physicists themselves sometimes unintentionally sometimes with tongue in cheek sometimes to satirize perceived weaknesses in research practices Examples range from hoaxes aimed at exposing poor editorial standards in academic publications through thought experiments that sound like the plot of a sci fi movie to April Fools jokes Even the latter may carry a serious message whether about the sociology of science or poking fun at legitimate but far out scientific hypotheses This entertaining book is a joyous romp exploring the whole spectrum of fake physics from science to fiction and back again

Representing Translation Dror Abend-David, 2019-02-21 In an increasingly global and multilingual society translators have transitioned from unobtrusive stagehands to key intercultural mediators a development that is reflected in contemporary media From Coppola's *Lost in Translation* to television's *House M.D.* and from live performance to social media translation is rendered as not only utilitarian but also performative and communicative In examining translation as a captivating theme in film television commercials and online content this multinational collection engages with the problems and limitations faced by translators as well as the ethical and philosophical aspects of translation and Translation Studies Contributors examine the role of the translator as protagonist agent negotiator and double agent translation in global communication the presentation of visual texts multilingualism in contemporary media and the role of foreign languages in advertisements Translation and translators are shown as inseparable parts of a contemporary life that is increasingly multilingual multiethnic multinational and socially diverse

The Greatest Inventions Ever Jaideep Gupte, 2025-07-30 Everyday billions of people wake up on planet Earth pick up their toothbrush use a kettle run through their smartphone sit in a train bus car and head for work college school They may use a desktop laptop tablet and return home at the end of the day Some may watch some television others just grab dinner and crash out only to repeat this cycle over and over day after day The routine gets so mechanical that only a tiny fraction ever wonder how the things they used during the day were conceived in the first place Very few of these billions realize that all the little conveniences they took for granted during the day are a result of eons of deep cognitive processes and scores of trial and error methods The masterminds behind these stunningly creative works have long remained as some far flung and unsung heroes but it is they who have made our lives as smooth as butter and as soft as velvet This book dives into the origin of all these little conveniences called Inventions the stories and minds behind them Starting with the Stone Age and spanning numerous civilizations and countries the book looks into all the defining things that have been invented so far how they work and what could be invented in the future It also takes a peek into how Inventions have shaped the relationship between countries and civilizations how they rose and fell across various civilizations and why some countries have been consistently better at inventing than other countries The book aims to ignite the spark of curiosity among the readers at the same time helping the reader appreciate the ingenuity of these unsung heroes who lie forgotten on some dusty and nondescript shelves
