Big Data: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2016-04-20
The digital age has presented an exponential growth in the amount of data available to individuals looking to draw conclusions based on given or collected information across industries Challenges associated with the analysis security sharing storage and visualization of large and complex data sets continue to plague data scientists and analysts alike as traditional data processing applications struggle to adequately manage big data Big Data Concepts Methodologies Tools and Applications is a multi volume compendium of research based perspectives and solutions within the realm of large scale and complex data sets Taking a multidisciplinary approach this publication presents exhaustive coverage of crucial topics in the field of big data including diverse applications storage solutions analysis techniques and methods for searching and transferring large data sets in addition to security issues Emphasizing essential research in the field of data science this publication is an ideal reference source for data analysts IT professionals researchers and academics *Emerging Technologies in Data Mining and Information Security* João Manuel R. S. Tavares, Satyajit Chakrabarti, Abhishek Bhattacharya, Sujata Ghatak, 2021-05-04 This book features research papers presented at the International Conference on Emerging Technologies in Data Mining and Information Security IEMIS 2020 held at the University of Engineering Management Kolkata India during July 2020 The book is organized in three volumes and includes high quality research work by academicians and industrial experts in the field of computing and communication including full length papers research in progress papers and case studies related to all the areas of data mining machine learning Internet of things IoT and information security *NUREG/CR. U.S. Nuclear Regulatory Commission, 1979* *Intelligent Image Processing, Data Analysis & Information Retrieval* Masoud Mohammadian, 1999 This edited volume is dedicated to the theory and applications of Computational Intelligence techniques for Intelligent Image Processing Data Analysis and Information Retrieval It consists of 52 accepted research papers from the 1999 International Conference on Computational Intelligence for Modeling Control and Automation CIMCA 99 The goal of this conference was to provide a medium for the exchange of ideas between theoreticians and practitioners to address the important issues in computational intelligence for modelling control and automation The research papers presented in this book cover new techniques and applications in the of Image Processing Computer Vision Multimedia Systems Filtering Classification Data Analysis Prediction Intelligent Database and Information Retrievals **Monthly Catalog of United States Government Publications** United States. The Golden Thread Fuad Udemans, 2013-09-23 This book is an account of a ten year experiment whereby the scientist became an entrepreneur so as to experience his own theoretical model applied in a live social system society Profit motives and the clinical nature of science became muddled with norms rules and laws of social

systems and how different people applied and responded to these rules The insights to be gained from this journey are often surprising The book highlights many counter intuitive outcomes It also reveals how certain individuals interpret societys rules and norms despite their design to ensure fair and equitable social systems Indeed the manipulation of social laws and standards by those with strong fields of power is self evident and it is explored in a unique manner Understanding how the field of power can be manipulated suggests that no matter how bleak ones current position may be it is very possible and relatively easy to escape conditions of poverty oppression and subjugation vital issues that citizens in all countries face today
