Stata User's Guide, 2007-01-01 **Developing a Protocol for Observational Comparative Effectiveness**

Research: A User's Guide Agency for Health Care Research and Quality (U.S.), 2013-02-21 This User's Guide is a resource for investigators and stakeholders who develop and review observational comparative effectiveness research protocols. It explains how to 1 identify key considerations and best practices for research design 2 build a protocol based on these standards and best practices and 3 judge the adequacy and completeness of a protocol. Eleven chapters cover all aspects of research design including developing study objectives defining and refining study questions addressing the heterogeneity of treatment effect characterizing exposure selecting a comparator defining and measuring outcomes and identifying optimal data sources. Checklists of guidance and key considerations for protocols are provided at the end of each chapter. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program particularly those who participated in AHRQ's DECIDE Developing Evidence to Inform Decisions About Effectiveness program. Chapters were subject to multiple internal and external independent reviews. More information please consult the Agency website www.effectivehealthcare.ahrq.gov.

The SAGE Handbook of Multilevel Modeling Marc A. Scott, Jeffrey S. Simonoff, Brian D. Marx, 2013-08-31 In this important new Handbook the editors have gathered together a range of leading contributors to introduce the theory and practice of multilevel modeling. The Handbook establishes the connections in multilevel modeling bringing together leading experts from around the world to provide a roadmap for applied researchers linking theory and practice as well as a unique arsenal of state of the art tools. It forges vital connections that cross traditional disciplinary divides and introduces best practice in the field. Part I establishes the framework for estimation and inference including chapters dedicated to notation model selection fixed and random effects and causal inference. Part II develops variations and extensions such as nonlinear semiparametric and latent class models. Part III includes discussion of missing data and robust methods assessment of fit and software. Part IV consists of exemplary modeling and data analyses written by methodologists working in specific disciplines. Combining practical pieces with overviews of the field this Handbook is essential reading for any student or researcher looking to apply multilevel techniques in their own research.

Nutritional Epidemiology of Breast Cancer Alvaro Luis Ronco, Eduardo De Stéfani, 2011-10-20 The book is the first one published exclusively on the field of nutritional epidemiology of breast cancer. It summarizes the currently existing knowledge with an updated and comprehensive international bibliography 1 000 references. The authors also performed a review on the epidemiological studies on nutrition and breast cancer carried out in Uruguay between 1994 and 2011 which allowed exploring and identifying the main risk and protective factors for the disease in this high risk country. Epidemiologists Nutritionists Public Health managers and breast specialists from the prevention to the treatment fields will find in this book a unique source of technical information which will contribute in expanding their knowledge and view of the disease. The Place of Law Larry D. Barnett, 2011-12-31 In this stimulating volume Larry D Barnett locates a fundamental defect in widespread assumptions regarding the institution of law He asserts that scholarship on law is being led astray by currently accepted beliefs about the institution and as a result progress in understanding law as a societal institution will be impeded until a more accurate view of law is accepted This book takes on this challenge The Place of Law addresses two questions that are at the heart of the institution of law Why is law an evidently universal enduring institution in societies characterized by a relatively high level of economic development and a relatively high degree of social complexity And why do the concepts and doctrines of the institution of law differ between jurisdictions states or nations at one point in time and vary within a particular jurisdiction over time These two questions Barnett believes should be prominent in any study of law The framework for law Barnett proposes is concerned with activities that are fundamental aspects of social organization that is activities that are deeply embedded in social life His viewpoint is grounded on a body of quantitative research pertinent to the societal sources and limits of law Barnett argues that this perspective applies only to law in sovereign democratic nations that are economically advanced and socially complex In other environments law s place as a societal institution is less secure This innovative perspective will do much to enhance understanding and appreciation of the role of law in modern societies
