
BSC 101 Final Exam Study Guide (Illinois State University)

Why is the scientific method bad? - Answer-It is oversimplified, it implies that an experiment can answer a research question. Science isn't linear. It implies science is an independent effort, no creativity or imagination, and it ignores technology and society

What is a theory? - Answer-Theories are broad explanations. They are supported by lines o evidence, with no contradictory evidence. Therefore the evolutionary theory isn't just a "theory"

Why don't community analysis and feedback insure the accuracy of scientific information? - Answer-You get peer revisions and discuss with colleagues. During these discussions, you can come up with new ideas and build theories

What are (6) examples that all living things must do? - Answer-1. have organized structures made of at least one cell

2. respond to stimuli

3.reproduce, even through adaptions by natural selection

4. Grow and develop

5. Maintain Homeostasis

6. Process energy

What is a Prokaryotic cell? - Answer-Has a cell membrane but no nucleus, and no mitochondria

What is a Eukaryotic cell? - Answer-Has a cell membrane, nucleus, and mitochondria. Eukaryotic cells are also larger than Prokaryotic

misconduct was constructed through the enforcement policies and practices of the powerful UK financial conduct regulator and its interactions with the subjects of enforcement proceedings and their legal representatives during a tumultuous time in the financial markets Drawing from interviews with regulators professional intermediaries and markets participants documentary analysis of enforcement decisions and speeches and observations the volume adopts an interdisciplinary approach grounded in social constructivist perspectives on compliance and deviance regulation theory and socio legal research Through a multi dimensional analytical framework of regulatory enforcement activism that links shifts in regulatory policymaking experimentations with legal powers in information gathering legal and extra legal penalties and individual accountability and the use of enforcement tools in micro level interactions the book documents a more interventionist and punitive post crisis enforcement agenda The findings challenge current thinking in the scandal and reform literature The work argues that despite the increased focus on enforcement it is not necessarily the case that the power has tilted more towards the regulator This fine grained socio legal enquiry makes innovative and timely theoretical contributions to our understanding of the limitations of regulatory activism and regulatory control regulatory relationships the governance of financial markets and broader thinking on regulating corporations and the individuals within them It will appeal to academics researchers regulators and policymakers working in regulation across law criminology sociology and politics
