

# Windows API Guide

Last Updated: July 7, 2002

Welcome to the Windows API Guide! Here, you will discover a wealth of information to help you implement calls to the Windows API directly from your Visual Basic programs. This site is part of a work in progress; it tells about re-organizing the entire Windows API. Nevertheless, new information about functions and the like is added every time we drop words. Check back often to see what's new!

## The New Guru Is Here!

Hello fellow programmers! I'm Chris Pertschauer, and I will be updating this site from now on. There isn't anything new yet, but I'm working on a new format for the site. All the old stuff will remain in the old look, and only new stuff will have the new look. But I will still update the old stuff.

## Reference

The **Reference** section contains documentation on hundreds of Windows API functions. Besides the functions, information on the related structures and other items also appears for reference. Each function page includes a well-commented example illustrating a common usage of the function.

## Articles

The **Articles** section contains articles about API-related topics. These multi-page articles go in-depth about a specific issue in the API and offer a more well-rounded approach to learning about API functions without much technical information. Of course, the reference information for each function is only a click away.

Still can't find what you're looking for anywhere on the site? Then try browsing the [IT-World.com](#) web site. Along with their sizable collection of Visual Basic programming information, they offer many an [API programming section](#) filled with helpful articles, some of which cover ideas not currently discussed on this web site.
