Reichsrock Kirsten Dyck, 2016-10-03 From rap to folk to punk music has often sought to shape its listeners political views uniting them as a global community and inspiring them to take action Yet the rallying potential of music can also be harnessed for sinister ends As this groundbreaking new book reveals white power music has served as a key recruiting tool for neo Nazi and racist hate groups worldwide Reichsrock shines a light on the international white power music industry the fandoms it has spawned and the virulently racist beliefs it perpetuates Kirsten Dyck not only investigates how white power bands and their fans have used the internet to spread their message globally but also considers how distinctly local white power scenes have emerged in Western Europe Eastern Europe Latin America the United States and many other sites While exploring how white power bands draw from a common well of nationalist racist and neo Nazi ideologies the book thus also illuminates how white power musicians adapt their music to different locations many of which have their own terms for defining whiteness and racial otherness Closely tracking the online presence of white power musicians and their fans Dyck analyzes the virtual forums and media they use to articulate their hateful rhetoric This book also demonstrates how this fandom has sparked spectacular violence in the real world from bombings to mass shootings Reichsrock thus sounds an urgent message about a global menace

Alexander, Michael Goodrum, Philip Smith, 2022-01-04 Contributions by Lawrence Abrams Dorian L. Alexander Max Bledstein Peter Cullen Bryan Stephen Connor Matthew J. Costello Martin Flanagan Michael Fuchs Michael Goodrum Bridget Keown Kaleb Knoblach Christina M. Knopf Martin Lund Jordan Newton Stefan Rabitsch Maryanne Rhett and Philip Smith History has always been a matter of arranging evidence into a narrative but the public debate over the meanings we attach to a given history can seem particularly acute in our current age Like all artistic mediums comics possess the power to mold history into shapes that serve its prospective audience and creator both It makes sense then that

history no stranger to the creation of hagiographies particularly in the service of nationalism and other political ideologies is so easily summoned to the panelled page Comics like statues museums and other vehicles for historical narrative make both monsters and heroes of men while fueling combative beliefs in personal versions of United States history *Drawing the Past Volume 1 Comics and the Historical Imagination in the United States* the first book in a two volume series provides a map of current approaches to comics and their engagement with historical representation The first section of the book on history and form explores the existence shape and influence of comics as a medium The second section concerns the question of trauma understood both as individual traumas that can shape the relationship between the narrator and object and historical traumas that invite a reassessment of existing social economic and cultural assumptions The final section on mythic histories delves into ways in which comics add to the mythology of the US Together both volumes bring together a range of different approaches to diverse material and feature remarkable scholars from all over the world

Conspiracies and Conspiracy Theories in American History Christopher R. Fee, Jeffrey B. Resources in Education , 2000-10 America as Second Creation David E. Nye, 2004-09-17 An exploration of the dialogue that emerged after 1776 between different visions of what it meant to use new technologies to transform the land After 1776 the former American colonies began to reimagine themselves as a unified self created community Technologies had an important role in the resulting national narratives and a few technologies assumed particular prominence Among these were the axe the mill the canal the railroad and the irrigation dam In this book David Nye explores the stories that clustered around these technologies In doing so he rediscovers an American story of origins with America conceived as a second creation built in harmony with God s first creation While mainstream Americans constructed technological foundation stories to explain their place in the New World however marginalized groups told other stories of destruction and loss Native Americans protested the loss of their forests fishermen resisted the construction of dams and early environmentalists feared the exhaustion of resources A water mill could be viewed as the kernel of a new community or as a new way to exploit labor If passengers comprehended railways as part of a larger narrative about American expansion and progress many farmers attacked railroad land grants To explore these contradictions Nye devotes alternating chapters to narratives of second creation and to narratives of those who rejected it Nye draws on popular literature speeches advertisements paintings and many other media to create a history of American foundation stories He shows how these stories were revised periodically as social and economic conditions changed without ever erasing the earlier stories entirely The image of the isolated frontier family carving a homestead out of the wilderness with an axe persists to this day alongside later images and narratives In the book s conclusion Nye considers the relation between these earlier stories and such later American developments as the conservation movement narratives of environmental recovery and the idealization of wilderness Control of the Imaginary Luiz Costa Lima, 1988 Control of the Imaginary was first published in 1989 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions In Control of the Imaginary Luiz Costa Lima explains how the distinction between truth and fiction emerged at the beginning of modern times and why upon its emergence fiction fell under suspicion Costa Lima not only describes the continuous relationship between Western notions of reason and subjectivity over a broad time frame the Renaissance to the first decade of the twentieth century but he uses this occasion to reexamine the literary traditions of France Italy Spain Portugal England and Germany The book reconstructs the dominant frames in the European tradition between the Middle Ages and the nineteenth century from the perspective of a Latin American who sees the culture of his native Brazil haunted by unresolved questions from the Northern Hemisphere Costa Lima manages to synthesize positions from philosophy anthropology sociology psychology linguistics and history without separating the theoretical discussion from his historical reconstructions The first chapter situates the problem and grounds the emergent distinction between truth and

fiction in a very close analysis of one of the first European historians Fernao Lopes who sets the tone for the condemnation of fiction in the name of the truth of history and the potential for individual interpretation Costa Lima pursues these notions through the aesthetic debates of the seventeenth and eighteenth centuries to the writings of the French historian Michelet He also devotes an illuminating chapter to the invention of the strictures imposed on fiction
