Maxton,John Wormald,2004-11-04 The automotive industry ranks among the most significant business phenomena of the 20th century and remains vitally important today accounting for almost 11% of the GDP of North America Europe and Japan and one in nine jobs In economic and social terms alike its products have had a fundamental impact on modern society for better and worse Yet the industry has found it hard to adjust to recent challenges and is no longer much valued by the capital markets It is riven with internal contradictions that inhibit reform and faces a stark choice between years of strife or radical change This book is a wake up call for those who work in the automotive business It highlights the challenges and opportunities that exist for managers legislators financial institutions and potential industry entrants Most of all it gives us all cause to reflect on the value of our mobility today and tomorrow *Ward's World Motor Vehicle Data 2008* ,2008 **The Weekly Japan Digest** ,2002 **Surfing the Global Tide** Michael S. Wynn-Williams,2009-04-22 This book is a highly interesting historical economic and conceptual analysis of the automobile industry from a paradigmatic perspective It explains in great detail how scale and structure of car companies worldwide are determined by economies of scale and a certain extent of vertical integration It also shows the limits of the present Budd paradigm and provides an outlook to alternatives This book is highly recommended for those interested in cars nearly all of us especially in this time of economic crisis that has great impact on the car industry as we know it Philip J Vergragt Ph D Professor Emeritus of Technology Assessment Senior Associate Tellus Institute Surfing the Global Tide is an important book at an important time With automakers worldwide being battered by the global financial crisis speculation abounds about consolidation realignment and bankruptcy Wynn Williams ambitious work applies to any company on the edge In pinpointing the minimum size a carmaker must be to survive on its own his research draws richly from both the theories of economics and the realities of the factory floor His answer is that successful automakers can churn out a surprisingly low number of vehicles per year The implications are broad reaching for a range of manufacturers from Japan s Mazda Motor Corp and Germany s Daimler AG to the nascent Chinese brands Surfing is fascinating read for anyone interested in the future path of the globalized auto industry Hans Greimel Asia Editor Automotive
