Computer Security John S. Potts, 2002 We live in a wired society with computers containing and passing around vital information on both personal and public matters Keeping this data safe is of paramount concern to all

Yet not a day seems able to pass without some new threat to our computers. Unfortunately the march of technology has given us the benefits of computers and electronic tools while also opening us to unforeseen dangers. Identity theft, electronic spying and the like are now standard worries. In the effort to defend both personal privacy and crucial databases, computer security has become a key industry. A vast array of companies devoted to defending computers from hackers and viruses have cropped up. Research and academic institutions devote a considerable amount of time and effort to the study of information systems and computer security. Anyone with access to a computer needs to be aware of the developing trends and growth of computer security. To that end, this book presents a comprehensive and carefully selected bibliography of the literature most relevant to understanding computer security. Following the bibliography section, continued access is provided via author title and subject indexes. With such a format, this book serves as an important guide and reference tool in the defence of our computerised culture.

Deep Learning with PyTorch Quick Start Guide David Julian, 2018-12-24. Introduction to deep learning and PyTorch by building a convolutional neural network and recurrent neural network for real-world use cases such as image classification, transfer learning, and natural language processing. Key Features: Clear and concise explanations; Gives important insights into deep learning models; Practical demonstration of key concepts. Book Description: PyTorch is extremely powerful and yet easy to learn. It provides advanced features such as supporting multiprocessor, distributed, and parallel computation. This book is an excellent entry point for those wanting to explore deep learning with PyTorch to harness its power. This book will introduce you to the PyTorch deep learning library and teach you how to train deep learning models without any hassle. We will set up the deep learning

environment using PyTorch and then train and deploy different types of deep learning models such as CNN RNN and autoencoders You will learn how to optimize models by tuning hyperparameters and how to use PyTorch in multiprocessor and distributed environments We will discuss long short term memory network LSTMs and build a language model to predict text By the end of this book you will be familiar with PyTorch s capabilities and be able to utilize the library to train your neural networks with relative ease What you will learn Set up the deep learning environment using the PyTorch library Learn to build a deep learning model for image classification Use a convolutional neural network for transfer learning Understand to use PyTorch for natural language processing Use a recurrent neural network to classify text Understand how to optimize PyTorch in multiprocessor and distributed environments Train optimize and deploy your neural networks for maximum accuracy and performance Learn to deploy production ready models Who this book is for Developers and Data Scientist familiar with Machine Learning but new to deep learning or existing practitioners of deep learning who would like to use PyTorch to train their deep learning models will find this book to be useful Having knowledge of Python programming will be an added advantage while previous exposure to PyTorch is not needed
