The multidisciplinary nature of learning games development is key to successful projects. In this book, field leaders in serious games and professionals in entertainment games share practical guidelines and lessons from their own experiences researching and developing learning games. This volume includes the key elements of design and development that require particular attention from multiple disciplines to ensure success. An overview of successful models and methods and the trade-offs made throughout the process to guide development. Cohesive multidisciplinary views of the issues that arise and of the techniques applied in order to produce effective learning games grounded in specific experiences, community consensus, and analysis of successful learning games that have already been released. The stories behind the games to illustrate how final design and development decisions were reached. Aimed at professionals and academics interested in developing and researching learning games, it offers a comprehensive picture of the state of the art.

The Repair of Historic Wooden Windows John H. Myers, 1981
A Research Guide to Cartographic Resources Eva H. Dodsworth, 2018-09-22
The interdisciplinary uses of traditional cartographic resources and modern GIS tools allow for the analysis and discovery of information across a wide spectrum of fields. *A Research Guide to Cartographic Resources* navigates the numerous American and Canadian cartographic resources available in print and online, offering researchers, academics, and students with information on how to locate and access the large variety of resources, new and old. Dozens of different cartographic materials are highlighted and summarized along with lists of map libraries and geospatial centers and related professional associations. *A Research Guide to Cartographic Resources* consists of 18 chapters, two appendices, and a detailed index that includes place names and libraries structured in a manner consistent with most reference guides, including cartographic categories such as atlases, dictionaries, gazetteers, handbooks, maps, plans, GIS data, and other related material. Almost all of the resources listed in this guide are categorized by geography down to the county level, making efficient work of the type of material required to meet the information needs of those interested in researching place-specific cartographic-related resources. Additionally, this guide will help those interested in not only developing a comprehensive collection in these subject areas but also get an understanding of what materials are being collected and housed in specific map libraries, geospatial centers, and their related websites. Of particular value are the sections that offer directories of cartographic and GIS libraries as well as comprehensive lists of geospatial datasets down to the county level. This volume combines the traditional and historical collections of cartography with the modern applications of GIS-based maps and geospatial datasets.
