

## NETWORK LAB MANUAL

### Exercise 1:

To learn to use ethereal to capture and analyze packets.

To do: Start ethereal on one or both interfaces that the machine has. Go to the *capture* menu and select the *start* option. Wait for some time and after enough packets have been captured, stop the capture.

Output: Ethereal output will show three frames.

- The first one will consist of one line messages for all packets captured stating the basic protocol type of the packet.
- The second frame will show the packet headers present in each packet – such as Ethernet, IP, UDP etc. Each of these headers can be expanded and the values of the various fields in these headers should be observed.
- The third frame consists of the hex dump of the packet. This can be related to the headers in the second frame

What to look for:

- For each different protocol type seen in the ethereal output, identify what is the demultiplexing field in the ethernet frame
- Identify how ethereal is able to classify the output as belonging to a particular protocol

Answer:

1. Why do you see many *ARP Requests* but not many *ARP replies* in the output?

### Exercise 2:

To learn how to configure IP addresses in Linux and understand rules of IP addressing

To do: Disconnect the machines from the general LAN. Using the switches provided, connect the machines into different switches – two or three per switch. Configure any random IP address to each of the machines.

How to: Use *net* command in RedHat versions of Linux. Or, alternately, use the command *ifconfig*.

Output: The IP address of the machine should be the configured value.

How to verify: Use the command *ifconfig*. This gives the IP addresses assigned to each of the interfaces of the machine. The other method is to *ping* to the address given. *ping* to a wrong address to see what happens.

Check: Reachability of other machines – do this by using the *ping* command.

1. whether you are able to reach the other machines connected to your switch.
2. whether you are able to reach machines connected to other switches.
