Wireless Motor Control Circuit:

Proceedings of the 35th International MATADOR Conference Srichand Hinduja, Kuang-Chao Fan, 2007-06-30

Presented here are 88 refereed papers given at the 35th MATADOR Conference held at the National University of Taiwan in Taipei Taiwan in July 2007 The MATADOR series of conferences covers the topics of Manufacturing Automation and Systems Technology Applications Design Organisation and Management and Research The proceedings of this conference contains original papers contributed by researchers from many countries on different continents The papers cover the principles techniques and applications associated with manufacturing processes technology system design and integration and computer applications and management The papers in this volume reflect the importance of manufacturing in international wealth creation the emerging fields of micro and nano manufacture the increasing trend towards the fabrication of parts using additive processes the growing demand for precision engineering and part inspection techniques measurement techniques and equipment

RF/Microwave Engineering and Applications in Energy Systems Abdullah Eroglu, 2022-05-02 RF MICROWAVE ENGINEERING AND APPLICATIONS IN ENERGY SYSTEMS An essential text with a unique focus on RF and microwave engineering theory and its applications In RF Microwave Engineering and Applications in Energy Systems accomplished researcher Abdullah Eroglu delivers a detailed treatment of key theoretical aspects of radio frequency and microwave engineering concepts along with parallel presentations of their practical applications The text includes coverage of recent advances in the subject including energy harvesting methods RFID antenna designs HVAC system controls and smart grids The distinguished author provides step by step solutions to common engineering problems by way of numerous examples and offers end of chapter problems and solutions on each topic These practical applications of theoretical subjects aid the reader with retention and recall and demonstrate a solid connection between theory and practice The author also applies common simulation tools in several chapters illustrating the use and implementation of time domain circuit simulators in conjunction with electromagnetic simulators as well as Matlab for design simulation and implementation at the component and system levels Readers will also benefit from A thorough introduction to the foundations of electromagnetics including line surface and volume integrals vector operation and theorems and Maxwell's equations Comprehensive explorations of passive and active components in RF and microwave engineering including resistors capacitors inductors and semiconductor materials and active devices Practical discussions of transmission lines including transmission line analysis Smith charts microstrip lines and striplines In depth examinations of network parameters including impedance parameters ABCD parameters h Hybrid parameters and network connections Perfect for senior level undergraduates and graduate students studying RF or Microwave engineering RF Microwave Engineering and Applications in Energy Systems is also an indispensable resource for professionals whose work touches on radio frequency and microwave technologies
