Everhart,2022-12-29 A story of everyday life in an American junior high school originally published in 1983 this book demonstrates the ways in which the school culture of early adolescence both supports and denies the cultural and economic requirements of the parent society that surrounds it It explores this school culture in relation to the local and national in political economy to class race and gender and to the needs of the state The author approaches the work of students in school as a labor process in the context of an advanced capitalist society He describes such typical junior high activities as goofing off and bugging the teacher by examining the meaning of these activities to the students engaged in them and brings acute observation and sensitivity to bear on the forms of resistance that arise among the students showing that this resistance is a form of power which students exercise in the face of their estranged status The nature and consequences of this resistance are examined in detail especially as they relate to the context of a society in which estranged labor in one form or another is the dominant characteristic for most members Throughout the book the subtle pressures the cliques the vitality the boredom and the ever present humor of school life are explored By integrating the insights of Habermas with the theories of Marx the author is able to examine the tension between the reified knowledge of the school and the regenerative knowledge of the students in a sensitive ethnography which captures the student world in ways which have been missed in the past *Educart ICSE Class 10 One-shot Question Bank 2026 English Litreature (strictly for 2025-26 boards)* Sir Tarun Rupani,2025-07-12 Chapterwise revision exam style practice for ICSE English Literature This One shot Question Bank by Sir Tarun Rupani is designed to help ICSE Class 10 students build confidence in answering extract based and analytical questions from all prescribed poems prose and drama Ideal for quick yet complete revision the book follows the latest ICSE 2025 26 syllabus and board paper design Key Features Strictly Based on ICSE 2025 26 Syllabus All prescribed texts included from The Merchant of Venice Treasure Trove Poems and Short

Education E. Glasersfeld,2006-04-11 Mathematics is the science of acts without things and through this of things one can
 define by acts 1 Paul Val ry The essays collected in this volume form a mosaik of theory research and practice directed at the
 task of spreading mathematical knowledge They address questions raised by the recurrent observation that all too frequently
 the present ways and means of teaching mathematics generate in the student a lasting aversion against numbers rather than
 an understanding of the useful and sometimes enchanting things one can do with them Parents teachers and researchers in
 the field of education are well aware of this dismal situation but their views about what causes the wide spread failure and
 what steps should be taken to correct it have so far not come anywhere near a practicable consensus The authors of the
 chapters in this book have all had extensive experience in teaching as well as in educational research They approach the
 problems they have isolated from their own individual perspectives Yet they share both an overall goal and a specific
 fundamental conviction that characterized the efforts about which they write here The common goal is to find a better way to

teach mathematics The common conviction is that knowledge cannot simply be transferred ready made from parent to child or from teacher to student but has to be actively built up by each learner in his or her own mind *Survival Skills for the New Elementary Teacher* Jeannette M.
