Ripley, 2005-02-25 The Wiley Interscience Paperback Series consists of selected books that have been made more accessible to consumers in an effort to increase global appeal and general circulation With these new unabridged softcover volumes Wiley hopes to extend the lives of these works by making them available to future generations of statisticians, mathematicians and scientists Books such as this that bring together, clarify and summarize recent research can lead to a great increase of interest in the area a major achievement in describing many aspects of spatial data and discussing with examples different methods of analysis

Royal Statistical Society Dr Ripley's book is an excellent survey of the spatial statistical methodology. It is very well illustrated with examples that give a clear view of the wide scope of the subject the way in which techniques often have to be tailored to particular applications and the different sorts of spatial data that arise. The Bulletin of the London Mathematical Society Spatial Statistics provides a comprehensive guide to the analysis of spatial data. Each chapter covers a particular data format and the associated class of problems introducing theory giving computational suggestions and providing examples. Methods are illustrated by computer drawn figures. The book serves as an introduction to this rapidly growing research area.

for mathematicians and statisticians and as a reference to new computer methods for researchers in ecology geology archaeology and the earth sciences. **Preparing for the Worst** Hrishikesh (Rick) D. Vinod, Derrick Reagle, 2004-10-28. A timely approach to downside risk and its role in stock market investments. When dealing with the topic of risk analysis most books on investments treat downside and upside risk equally. Preparing for the Worst takes an entirely novel approach by focusing on downside risk and explaining how to incorporate it into investment decisions. Highlighting this asymmetry of the stock market the authors describe how existing theories miss the downside and follow with explanations of how it can be included. Various techniques for calculating downside risk are demonstrated. This book presents the latest ideas in the field from the ground up making the discussion accessible to mathematicians and statisticians interested in applications in finance as well as to finance professionals who may not have a mathematical background. An invaluable resource for anyone wishing to explore the critical issues of finance portfolio management and securities pricing this book incorporates Value at Risk into the theoretical discussion. Uses many examples to illustrate downside risk in U.S. international and emerging market investments. Addresses downside risk arising from fraud and corruption. Includes step by step instructions on how to implement the methods introduced in this book. Offers advice on how to avoid pitfalls in calculations and computer programming. Provides software use information and tips.

Discriminant Analysis and Statistical Pattern Recognition Geoffrey J. McLachlan, 2005-02-25. The Wiley Interscience Paperback Series consists of selected books that have been made more accessible to consumers in an effort to increase global appeal and general circulation. With these new unabridged softcover volumes Wiley hopes to extend the lives of these works by making them available to future generations of statisticians mathematicians and scientists. For both applied and theoretical statisticians as well as investigators working in the many areas in which relevant use can be made of discriminant techniques this monograph provides a modern comprehensive and systematic account of discriminant analysis with the focus on the more recent advances in the field. SciTech Book News a very useful source of information for any researcher working in discriminant analysis and pattern recognition. Computational Statistics Discriminant Analysis and Statistical Pattern Recognition provides a systematic account of the subject. While the focus is on practical considerations both theoretical and practical issues are explored. Among the advances covered are regularized discriminant analysis and bootstrap based assessment of the performance of a sample

based discriminant rule and extensions of discriminant analysis motivated by problems in statistical image analysis The accompanying bibliography contains over 1 200 references

Statistical Methods in Spatial Epidemiology Andrew B. Lawson, 2013-07-08 Spatial epidemiology is the description and analysis of the geographical distribution of disease It is more important now than ever with modern threats such as bio terrorism making such analysis even more complex This second edition of Statistical Methods in Spatial Epidemiology is updated and expanded to offer a complete coverage of the analysis and application of spatial statistical methods The book is divided into two main sections Part 1 introduces basic definitions and terminology along with map construction and some basic models This is expanded upon in Part II by applying this knowledge to the fundamental problems within spatial epidemiology such as disease mapping ecological analysis disease clustering bio terrorism space time analysis surveillance and infectious disease modelling Provides a comprehensive overview of the main statistical methods used in spatial epidemiology Updated to include a new emphasis on bio terrorism and disease surveillance Emphasizes the importance of space time modelling and outlines the practical application of the method Discusses the wide range of software available for analyzing spatial data including WinBUGS SaTScan and R and features an accompanying website hosting related software Contains numerous data sets each representing a different approach to the analysis and provides an insight into various modelling techniques This text is primarily aimed at medical statisticians researchers and practitioners from public health and epidemiology It is also suitable for postgraduate students of statistics and epidemiology as well professionals working in government agencies
