Realization. Part 1-Deterministic Mathematics Kartlos Joseph Kachiashvili,D. Yu. Melikdzhanian,A. I. Prangishvili,2015

Algorithms were always an important part of many branches in the sciences In many manuals and handbooks algorithms of problems of computational mathematics are focused on the manual performance or by means of a calculator In this book descriptions of algorithms their solutions and main characteristics are discussed The present work is the outcome of many years of the authors work on solving different problems and tasks from domains of instruction making metrology system analysis ecology data analysis from ecology agriculture medicine and creation of corresponding universal computer packages and systems *Problems on Algorithms* Habib Izadkhah,2022-11-01 With approximately 2500 problems this book provides a collection of practical problems on the basic and advanced data structures design and analysis of algorithms To make this book suitable for self instruction about one third of the algorithms are supported by solutions and some others are supported by hints and comments This book is intended for students wishing to deepen their knowledge of algorithm design in an undergraduate or beginning graduate class on algorithms for those teaching courses in this area for use by practicing programmers who wish to hone and expand their skills and as a self study text for graduate students who are preparing for the qualifying examination on algorithms for a Ph D program in Computer Science or Computer Engineering About all it is a good source for exam problems for those who teach algorithms and data structure The format of each chapter is just a little bit of instruction followed by lots of problems This book is intended to augment the problem sets found in any standard algorithms textbook This book begins with four chapters on background material that most algorithms instructors would like their students to have mastered before setting foot in an algorithms class The introductory chapters include mathematical induction complexity notations recurrence relations and basic algorithm analysis methods provides many problems on basic and advanced data structures including basic data structures arrays stack queue and linked list hash tree search and sorting algorithms provides many problems on algorithm design techniques divide and conquer dynamic programming greedy algorithms graph algorithms and backtracking algorithms is rounded out with a chapter on NP completeness **Algorithms for Solving Common Fixed Point Problems** Alexander J. Zaslavski,2018-05-02 This book details approximate solutions to common fixed point problems and convex feasibility problems in the presence of perturbations Convex feasibility problems search for a common point of a finite collection of subsets in a Hilbert space common fixed point problems pursue a common fixed point of a finite collection of self mappings in a Hilbert space A variety of algorithms are considered in this book for solving both types of problems the study of which has fueled a rapidly growing area of research This monograph is timely and

highlights the numerous applications to engineering computed tomography and radiation therapy planning. Totaling eight chapters, this book begins with an introduction to foundational material and moves on to examine iterative methods in metric spaces. The dynamic string averaging methods for common fixed point problems in normed space are analyzed in Chapter 3. Dynamic string methods for common fixed point problems in a metric space are introduced and discussed in Chapter 4. Chapter 5 is devoted to the convergence of an abstract version of the algorithm which has been called component averaged row projections. Chapter 6 studies a proximal algorithm for finding a common zero of a family of maximal monotone operators. Chapter 7 extends the results of Chapter 6 for a dynamic string averaging version of the proximal algorithm. In Chapters 8, subgradient projections algorithms for convex feasibility problems are examined for infinite dimensional Hilbert spaces.
