Sidwell, 2018-05-10 Reading Latin first published in 1986 is a bestselling Latin course designed to help mature beginners read classical Latin fluently and intelligently. It does this by combining the understanding of continuous texts with rigorous teaching of grammar; it provides exercises designed to develop the skills of accurate translation and integrates the learning of classical Latin with an appreciation of the influence of the Latin language upon English and European culture from antiquity to the present. The Independent Study Guide is intended to help students who are learning Latin on their own or with only limited access to a teacher. It contains notes on the texts that appear in the Text and Vocabulary volume, translations of all the texts, and answers to the exercises in the Grammar and Exercises volume. The book will also be useful to students in schools, universities, and summer schools who have to learn Latin rapidly. [The Oxford World History of Empire](#)

Peter Fibiger Bang, C. A. Bayly, Walter Scheidel, 2020-12-02 This is the first world history of empire reaching from the third millennium BCE to the present. By combining synthetic surveys, thematic comparative essays, and numerous chapters on specific empires, its two volumes provide unparalleled coverage of imperialism throughout history and across continents, from Asia to Europe and from Africa to the Americas. Only a few decades ago, empire was believed to be a thing of the past; now it is clear that it has been and remains one of the most enduring forms of political organization and power. We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods such as the relatively short age of European colonialism. The history of empire as these volumes amply demonstrate needs to be drawn on the much broader canvas of global history. Volume Two: The History of Empires tracks the protean history of political domination from the very beginnings of state formation in the Bronze Age up to the present. Case studies deal with the full range of the historical experience of empire, from the realms of the Achaemenids and Asoka to the empires of Mali and Songhay, and from ancient Rome and China to the Mughals, American settler colonialism, and the Soviet Union. Forty-five chapters detailing the history of individual empires are tied together by a set of global synthesizing surveys that structure the world history of empire into eight chronological phases. *History Teacher's Magazine*, 1911 *The United States Catalog* Mary Burnham, Carol Hurd, 1928
