Overview of the Skeleton: Classification and Structure of Bones and Cartilages

Name karen ortegoni Lab Time/Date july 29

Cartilages of the Skeleton

1. Using the key choices, identify each type of cartilage described (in terms of its body location or function) below.

Key: a. elastic b. fibrocartilage c. hyaline

elastic 1. supports the external ear

fibrocartilage 6. meniscus in a knee joint

fibrocartilage 2. between the vertebrae

hyaline 7. connects the ribs to the sternum

elastic 3. forms the walls of the voice box (larynx)

fibrocartilage 8. most effective at resisting compression

elastic 4. the epiglottis

elastic 9. most springy and flexible

hyaline 5. articular cartilages

hyaline 10. most abundant

Classification of Bones

2. The four major anatomical classification of bones are long, short, flat, and irregular. Which category has the least amount of spongy bone relative to its total volume? long bones
3. Classify each of the bones in the chart below as either long, short, flat, or irregular by placing a check mark in the appropriate column. Also use a check mark to indicate whether the bone is a part of the axial or the appendicular skeleton. Use Figure 8.1 as a guide.

	Long	Short	Flat	Irregular	Axial skeleton	Appendicular skeleton

drawing exercises and questions that help you demonstrate your understanding of the labs they have participated in Reader friendly spiral binding allows for hands free viewing in the lab setting Labeling and coloring exercises provide opportunities to identify critical structures examined in the lab and lectures Brief learning aids such as Hints Landmark Characteristics and Safety First are found throughout the manual to help reinforce and apply knowledge of anatomy and function Modern anatomical imaging techniques such as MRIs CTs and ultrasonography are introduced where appropriate Boxed hints and safety tips provide you with special insights on handling specimens using equipment and managing lab activities UPDATED Fresh activities keep the manual current and ensure a strong connection with the new edition of the A P textbook NEW Updated illustrations and design offer a fresh and upbeat look for the full color design and learning objectives NEW Expanded and improved student resources on the Evolve companion website include a new version of the Body Spectrum electronic coloring book

PhysioEx 7.0 for A&P Peter Z. Zao,2008 Forensic Anthropology Laboratory Manual Steven N. Byers,Chelsey A. Juarez,2024-11-11 This manual provides students in academic laboratory courses with hands on experience in the major processes of forensic anthropology Designed to accompany the textbook Introduction to Forensic Anthropology sixth edition the manual introduces core procedures and protocol with exercise worksheets to reinforce the methodologies of forensic anthropology and enhance student comprehension For the fifth edition the manual has been updated in line with the textbook incorporating new methods figures and worksheets Each chapter contains explanations of the terminology osteological features and measurements needed to understand each of the topics New for this edition in many chapters students will find the incorporation of QR codes to give them immediate access to relevant video or website content to assist with the task at hand In addition in an attempt to create an inclusive learning environment the authors have included online resources for most chapters that can be used in place of skeletons or other classroom resources so that all students can utilize the lab manual regardless of their classroom setup Chapters may be covered in one session or multiple sessions and include lists of both basic and optional lab materials enabling instructors to tailor each lab to the resources they have available

HUMAN SKELETAL ANATOMY Scott I. Fairgrieve,Tracy S. Oost,2001-01-01 The Human Skeletal Anatomy Laboratory Manual and Workbook has been designed to help students who are enrolled in courses dedicated to this topic It is the product of many years of designing and instructing a Human Skeletal Biology course for undergraduate students The key to this manual is flexibility Instructors may utilize as much or as little of the manual as they see fit It is largely based on the regional approach to anatomy However the first section of the manual begins with a survey of the microscopic and macroscopic structure of bone After grounding the student in the basics of bone structure the manual then turns to the gross morphological anatomy of skeletal elements The axial skeleton is dealt with first then the appendicular skeleton The manual is designed to cover material in an incremental fashion Specifically the anatomy of less complicated bones such as the ribs sternum and hyoid are discussed prior to other axial bones in order to acquaint students with how to

handle real bone material in the laboratory Each successive laboratory session demands more from the student in both the level of understanding and expectations in assigned laboratory exercises Each laboratory session begins with an introduction in order to familiarize the student with the areas to be studied Subsequently the laboratory session has a stated purpose with clear instructions of expectations and learning objectives Important Terms are clearly indicated in boxes to stress to students that these must be understood This is then followed by a clear laboratory Procedure for the student to follow This usually involves the identification of particular features of assigning specific tasks as identified in the various Exercises Finally as a means of stressing the applicability of what has been learned in the laboratory exercise the student will be requested to generate an evaluation of some aspect of the anatomy such as using a method for determining age at death from assigned specimens The student is then required to interpret this information and produce for the next class or session a Laboratory Research Report Guidelines for these reports are contained within this manual Diagrams photographs have been provided for students to label These diagrams are meant to be a study guide Instructors may wish to add anatomical features or de-emphasize certain features accordingly
