Body Technologies in the Greco-Roman World Maria Gerolemou, Giulia Maria Chesi, 2023-11-16 A collection of papers that introduces the notion of the technosoma techno body into discussions on the representations of the body in classical antiquity By applying the category of the technosoma to the natural body this volume explicitly narrows down the discussion of the technical and the natural to the physiological body In doing so the present collection focuses on body technologies in the specific form of beautification and body enhancement techniques as well as medical and surgical treatments The volume elucidates two main points Firstly ancient techno bodies

show that the categories of gender and sexuality are at the core of the intersection of the natural and the technical and intersect with notions of race age speciesism class and education and disability Secondly the collection argues that new body technologies have in fact a very ancient history that can help to address the challenges of contemporary technological innovation To this end the volume showcases the intersection of natural bodies with technology gender sexuality and reproduction On the one hand techno bodies tend to align with normative ideas about gender and sexuality On the other hand body modification and or enhancement techniques work hand in hand with economic and political power and knowledge thus they often produce techno bodies that are shaped according to individual needs i e according to a certain lifestyle Consequently techno bodies threaten to alter traditional ideas of masculinity femininity male and female sexuality and beauty
