working towards them sustains it By consciously focusing on what we have chosen to do and why and by working towards a goal in a positive and supportive environment we can harness motivation to help us achieve Personal Freedom If we understand how motivation works we can consciously choose to be motivated thereby escaping the victim complex that many people fall into in excusing their lack of success Editor s Notes The desire for Personal Freedom is the individual s desire to define and pursue their own values in life It is a natural and universal human drive and far from being selfish or narcissistic is necessary for us to improve ourselves as individuals Social oppression and fear of non conformity are identified by the author as the main threats to this desire and he argues that while understandable giving in to these forces represents a compromise of personal integrity and ultimately the sacrifice of personal happiness and well being **The Motivation**

The Motivation Manifesto for the Life-Claiming People Melanie Hutchinson,2015-04-03 Do you suffer from procrastination Do you put off the things you should be doing to do things you shouldn't be doing Are you constantly rushing to meet deadlines even though you had plenty of time to complete your project Do you know you could do better if only you had the motivation The secret is here in Melanie Hutchinson's The Motivation Manifesto Everyone can benefit from this work because Hutchinson identifies what procrastination is why people do it and how to change this destructive habit The Motivation Manifesto identifies the two types of goals we all at some point have as the doing goals we want to do and the being goals what we would like to be Procrastination erodes both types of goals but there's hope in the pages of this book Hutchinson kicks this off with how we should identify our personal goals of every type

She advises setting large major goals and then breaking them into smaller and smaller goals that correspond to smaller and smaller increments of time The Motivation Manifesto includes an important concept the concept of positive visualization It encourages us to envision in detail what life is like for us with our goals met For example if my goal is to run a 5K I would envision myself crossing the finish line proud and happy with my accomplishment Hutchinson also suggests an interesting technique called goal pictures to help our visualization efforts Hutchinson then delves into achieving our smaller goals with strategization If previous methods haven't been successful in our particular business then we should brainstorm new methods to achieve our objective Another key to addressing procrastination and gaining momentum is to prepare for obstacles and have a plan for addressing them if they arise For example if I'm writing an article for a newsletter I should save it to a cloud based service in case of power outage that affects my laptop The Motivation Manifesto also reminds us of the well known 80/20 principle that there are methods that are much more efficient than many others This helps out procrastination by helping us to isolate the most effective way to get things done Hutchinson also endorses drawing on resources already at hand your environment and overwhelming important projects with all available sources of energy in order to work most efficiently The Motivation Manifesto doesn't shy away from the concept of time management Hutchinson advocates a calendar based system for completing projects that she details explicitly in this book She also lists many tips for increasing personal discipline during work sessions so you get the most results out of each work day Along with positive visualization Hutchinson also suggests positive affirmations to stay mentally fresh and focused She quickly but thoroughly explains how to practice affirmations and weave them into our lives as a part of healthy daily practice Finally Hutchinson uses the method of rewarding ourselves when we have met daily weekly monthly and yearly goals She outlines what make good rewards and how to incorporate rewards into our system of work to keep us engaged with our most important projects
