The Welfare of Domestic Fowl and Other Captive Birds Ian J. H. Duncan, Penny Hawkins, 2009-12-29 Animal welfare is attracting increasing interest worldwide especially in developed countries where the knowledge and resources are available to at least potentially provide better management systems for farm animals as well as companion zoo and laboratory animals The key requirements for adequate food water a suitable environment appropriate companionship and good health are important for animals kept for all of these purposes

There has been increased attention given to farm animal welfare in many countries in recent years. This derives largely from the fact that the relentless pursuit of financial reward and efficiency to satisfy market demands has led to the development of intensive animal production systems that challenge the conscience of many consumers in those countries. In developing countries, human survival is still a daily uncertainty so that provision for animal welfare has to be balanced against human needs. Animal welfare is usually a priority only if it supports the output of the animal, be it food, work, clothing, sport, or companionship. In principle, the welfare needs of both humans and animals can be provided for in both developing and developed countries if resources are properly husbanded. In reality, however, the inequitable division of the world's riches creates physical and psychological poverty for humans and animals alike in many parts of the world. **Avian Cognition**
