Lost from View Nina Biehal, Fiona Mitchell, Jim Wade, 2003 Thousands of people are reported missing each year yet very little is known about who they are why they disappear and what happens to them Although the predicament of runaways and other missing children has a higher profile the issue of missing adults has been neglected in research and policy Drawing on almost 2000 missing persons cases the report explores who goes missing why people choose to go missing and how people can become missing in other circumstances the experiences of missing people while they are away and the risks that they may encounter how missing episodes

are resolved vbTab how further developments in policy and practice may assist missing people and their families This highly topical report demonstrates that the social problems underpinning the missing issue cut across many areas of social policy This book will therefore be essential reading for policy makers practitioners and academics in the fields of criminal justice child and family welfare health and social work The Internet for Physicians Roger P. Smith, 2006-04-12 Like the Internet itself interest in computing both local and distant has grown exponentially The rapidly changing role of the Internet has resulted in three very different editions of The Internet for Physicians The first edition attempted to introduce the concept of information transfer and communication and point the way toward a tool of the future The second edition attempted to assuage trepidation in the use of this emerging tool and suggest the why and wherefore of being connected The needs that drove those goals have almost completely disappeared As a result the bulk of this edition is more focused on the medical aspect of the Internet and its use and less on the nuts and bolts of connecting and communication through the Web It has been revamped reorganized and expanded to include 30% more content and 90 new illustrations New to the third edition is an entire section dedicated to Medicine and the Web with chapters discussing patient education and information what your patients are seeing on the web finding quality resources including clinical trial and evidence based medicine sites how to search and use Pun Med telemedicine continuing medical education medical literature and informatics applications of on line journals and submissions and much more **New Physician** ,2000 Vols 15 no 4 1966 include The Doctor and the law which retained separate volume numbering until 1974
