The Cambridge Companion to the Literature of the American Renaissance Christopher N. Phillips, 2018-03-07 The American Renaissance has been a foundational concept in American literary history for nearly a century The phrase connotes a period as well as an event an iconic turning point in the growth of a national literature and a canon of texts that would shape American fiction poetry and oratory for generations F O Matthiessen coined the term in 1941 to describe the years 1850 1855 which saw the publications of major writings by Hawthorne Melville Emerson Thoreau and Whitman This Companion takes up the concept of the American Renaissance and explores its origins meaning and longevity Essays by

distinguished scholars move chronologically from the formative reading of American Renaissance authors to the careers of major figures ignored by Matthiessen including Stowe Douglass Harper and Longfellow The volume uses the best of current literary studies from digital humanities to psychoanalytic theory to illuminate an era that reaches far beyond the Civil War and continues to shape our understanding of American literature

The End of Captivity? Tripp York,2015-07-30 In *The End of Captivity* Tripp York addresses how we talk about the good of other animals in light of a stark impossibility their freedom from us While all of us in the animal and plant kingdom are interdependent upon one another humans are unique in that we are the only animals who keep other animals captive We keep animals in zoos sanctuaries circuses conservatories aquariums research facilities slaughterhouses and on our farms and in our homes York asks what such forms of captivity say about us and how animal captivity shapes what we imagine to be the purpose of other animals What does the fact that elephants tigers and horses perform in circuses say about how we see the world What does the reality of zoological parks say about the people who create support decry protest and patronize them How important is wildlife conservation for the good of the earth What does who we put on our plate say about how we understand the theological role of other animals These are just a few questions York tackles as he weaves through the convoluted politics surrounding the captive animals in our midst

The Next Social Contract Wayne Gabardi,2017-05-15 In his provocative book *The Next Social Contract* Wayne Gabardi rigorously considers the fate of animals in the twenty first century He claims that if we are to address the challenges raised by the Anthropocene the period where nonhuman beings tend to be mere extras often subsumed under the umbrella notion of nature we need to radically rethink our basic ethical outlook and develop a new more than human social contract Gabardi's wide ranging and multidisciplinary analysis focuses on four principal battlegrounds of animal biopolitics in the twenty first century the extinction of wild animals the crisis of oceanic animals industrialized farm animals and the future of industrial agribusiness and the situation of contact zone animals moving into human occupied habitats In his recasting of the social contract Gabardi envisions a culture shift in human animal relations toward posthumanism that features the ethical and political prioritization of animal life so it is on par with that of human well being

Rhetorical Animals Kristian Bjørkdahl,Alex C. Parrish,2017-11-30 For this edited volume the editors solicited chapters that investigate the place of nonhuman animals in the purview of rhetorical theory what it would mean to communicate beyond the human community how rhetoric reveals our brute roots In other words this book investigates themes that enlighten us about likely or possible implications of the animal turn within rhetorical studies The present book is unique in its focus on the call for nonanthropocentrism in rhetorical studies Although there have been many hints in recent years that rhetoric is beginning to consider the implications of the animal turn as yet no other anthology makes this its explicit starting point and sustained objective Thus the various contributions to this book promise to further the ongoing debate about what rhetoric might be after it sheds its long standing humanistic bias

TIME the Science of Good and Evil The Editors of TIME,2019-04-15

One of the great enigmas of humanity is why we have such a devastating capacity for evil as well as such an enormous ability to do good. What makes some people commit violent harm while others risk their lives to help those they may not even know? Now to explore and navigate this essential question of human behavior, the editors at TIME bring you the special edition *The Science of Good and Evil*. You'll examine the roots of good and evil and consider the capacity for morality in animals. Then consider what makes us moral by looking at the seemingly innate moral compass of human children and the role that nurturing plays in developing it. Follow modern neuroscience deep into the brain to see what it can tell us about where good and evil behavior might reside and what role genuine love plays in their development. Through it all, visit and analyze tales of senseless acts of violence and the profound acts of selflessness that occur in their wake. As destructive technologies and artificial intelligence continue to develop and strengthen, there has never been a more important time to understand the nature of our capacity for good and evil.

When Animals Rescue Belinda Recio, 2021-05-25 A collection of true tales of animal empathy and altruism that will inspire us to reflect on our own human nature. What do stories about humpback whales protecting a biologist from a shark, a pride of lions rescuing a girl from kidnappers, gorillas working together to dismantle poacher snares, a parrot warding off an attacker in a park, a chimpanzee consoling a human, and an elephant trying to rescue a baby rhino tell us about animal nature? And what might they suggest about our very own human nature? Until just a few decades ago, there were only a few animals reported to behave empathetically and altruistically. More recently, the list of species who have been observed behaving in compassionate, helpful, and caring ways has grown exponentially, ranging from rats to elephants. *Rescued by a Whale* presents dozens of astonishing and heart-warming stories about animals such as chickens, horses, dolphins, and wolves who engage in acts of helpful kindness. During a time in history when studies show that human empathy is decreasing, our knowledge about animal empathy is increasing. These true tales of heroism, kindness, and compassion suggest that we have far more in common with other animals than we once believed and provocatively suggest that what's best about our human natures just might be our animal natures.

Animals and War Anthony J. Nocella II, Colin Salter, Judy K.C. Bentley, 2013-12-19 *Animals and War: Confronting the Military Animal Industrial Complex* is the first book to examine how nonhuman animals are used for war by military forces. Each chapter delves deeply into modes of nonhuman animal exploitation as weapons, test subjects, and transportation and as casualties of war, leading to homelessness, starvation, and death. With leading scholar-activists writing each chapter, this is an important text in the fields of peace studies and critical animal studies. This is a must-read for anyone interested in ending war and fostering peace and justice.

Why Dogs Hump and Bees Get Depressed Marc Bekoff, 2013-11-01 In 2009, Marc Bekoff was asked to write on animal emotions for *Psychology Today*. Some 500 popular, jargon-free essays later, the field of anthrozoology—the study of human-animal relationships—has grown exponentially, as have scientific data showing how smart and emotional nonhuman animals are. Here, Bekoff offers selected essays that showcase the fascinating cognitive abilities of other animals as well as their empathy.

compassion grief humor joy and love Humpback whales protect gray whales from orca attacks combat dogs and other animals suffer from PTSD and chickens rats and mice display empathy This collection is both an updated sequel to Bekoff's popular book *The Emotional Lives of Animals* and a call to begin the important work of rewilding ourselves and changing the way we treat other animals

Posthuman Folklore Tok Thompson, 2019-09-25 Can a monkey own a selfie Can a chimp use habeas corpus to sue for freedom Can androids be citizens Increasingly such difficult questions have moved from the realm of science fiction into the realm of everyday life and scholars and laypeople alike are struggling to find ways to grasp new notions of personhood *Posthuman Folklore* is the first work of its kind both an overview of posthumanism as it applies to folklore studies and an investigation of vernacular posthumanisms the ways in which people are increasingly performing the posthuman Posthumanism calls for a close investigation of what is meant by the term human and a rethinking of this our most basic ontological category What exactly is human What exactly am I There are two main threads of posthumanism the first dealing with the increasingly slippery slope between human and animal and the second dealing with artificial intelligences and the growing cyborg quality of human culture This work deals with both these threads seeking to understand the cultural roles of this shifting notion of human by centering its investigation into the performances of everyday life From funerals for AIBOs to furies to ghost stories told by Alexa people are increasingly engaging with the posthuman in myriad everyday practices setting the stage for a wholesale rethinking of our humanity In *Posthuman Folklore* author Tok Thompson traces both the philosophies behind these shifts and the ways in which people increasingly are enacting such ideas to better understand the posthuman experience of contemporary life

Reading the Hebrew Bible with Animal Studies Ken Stone, 2023-05-25 An excellent introduction to the field of animal studies the applications of these ideas to biblical passages illuminate the text in new ways Brandon R Gafius *Horizons in Biblical Theology* Animal studies may be a recent academic development but our fascination with animals is nothing new Surviving cave paintings are of animal forms and closer to us as Ken Stone points out animals populate biblical literature from beginning to end This book explores the significance of animal studies for the interpretation of the Hebrew Bible Combined with biblical scholarship animal studies sheds useful light on animals animal symbolism and the relations among animals humans and God not only for those who study biblical literature and its ancient context but for contemporary readers concerned with environmental social and animal ethics Without the presence of domesticated and wild animals neither biblical traditions nor the religions that make use of the Bible would exist in their current forms Although parts of the Bible draw a clear line between humans and animals other passages complicate that line in multiple ways and challenge our assumptions about the roles animals play therein Engaging influential thinkers including Jacques Derrida Donna Haraway and other experts in animal and ecological studies *Reading the Hebrew Bible with Animal Studies* shows how prehumanist texts reveal unexpectedly relevant dynamics and themes for our posthumanist age Stone's ecological sensibilities theoretical acumen and incisive exegetical arguments open up fresh perspectives Stephen D

Moore The Theological School Drew University This monograph is poised to become a key work in the field Anne L tourneau Reading Religion Groundbreaking Carol J Dempsey OP Horizons *Zoopolis* Sue Donaldson, Will Kymlicka, 2011-11-24

Zoopolis offers a new agenda for the theory and practice of animal rights Most animal rights theory focuses on the intrinsic capacities or interests of animals and the moral status and moral rights that these intrinsic characteristics give rise to Zoopolis shifts the debate from the realm of moral theory and applied ethics to the realm of political theory focusing on the relational obligations that arise from the varied ways that animals relate to human societies and institutions Building on recent developments in the political theory of group differentiated citizenship Zoopolis introduces us to the genuine political animal It argues that different types of animals stand in different relationships to human political communities Domesticated animals should be seen as full members of human animal mixed communities participating in the cooperative project of shared citizenship Wilderness animals by contrast form their own sovereign communities entitled to protection against colonization invasion domination and other threats to self determination Liminal animals who are wild but live in the midst of human settlement such as crows or raccoons should be seen as denizens resident of our societies but not fully included in rights and responsibilities of citizenship To all of these animals we owe respect for their basic inviolable rights But we inevitably and appropriately have very different relations with them with different types of obligations Humans and animals are inextricably bound in a complex web of relationships and Zoopolis offers an original and profoundly affirmative vision of how to ground this complex web of relations on principles of justice and compassion **When Animals Speak** Eva Meijer, 2019-11-26 Winner 2020 ASCA Book Award given by the Amsterdam School of Cultural Analysis A groundbreaking argument for the political rights of animals In *When Animals Speak* Eva Meijer develops a new ground breaking theory of language and politics arguing that non human animals speak and most importantly act politically From geese and squid to worms and dogs she highlights the importance of listening to animal voices introducing ways to help us bridge the divide between the human and non human world Drawing on insights from science philosophy and politics Meijer provides fascinating real world examples of animal communities who use their voices to speak and act in political ways *When Animals Speak* encourages us to rethink our relations with other animals showing that their voices should be taken into account as the starting point for a new interspecies democracy *Creative Compassion, Literature and Animal Welfare* Michael J. Gilmour, 2020-10-27 This book examines animal welfare themes in fiction and considers how authors of the last two centuries undermine dominative attitudes toward the nonhuman Appearing alongside the emerging humane movements of the nineteenth century and beyond is a kind of storytelling sympathetic to protectionist efforts well described as a literature of protest Compassion inclined tales like the *Dolittle* adventures by Hugh Lofting educate readers on a wide range of ethical questions empathize with the vulnerable and envision peaceful coexistence with other species Memorable characters like *Black Beauty* and *Beautiful Joe* Ivan the gorilla and Louis the trumpeter swan Hazel and Cheeta Mr Bultitude and Doctor Rat

do not merely amuse They are voices from the margins who speak with moral urgency to those with ears to hear This broad survey of ethical themes in animal fiction highlights the unique contributions creative writers make toward animal welfare efforts

Animal Subjects 2.0 Jodey Castricano, Lauren Corman, 2016-12-10 *Animal Subjects An Ethical Reader in a Posthuman World* WLU Press 2008 challenged cultural studies to include nonhuman animals within its purview While the question of the animal ricochets across the academy and reverberates within the public sphere *Animal Subjects 2 0* builds on the previous book and takes stock of this explosive turn It focuses on both critical animal studies and posthumanism two intertwining conversations that ask us to reconsider common sense understandings of other animals and what it means to be human This collection demonstrates that many pressing contemporary social problems how and why the oppression and exploitation of our species persist are entangled with our treatment of other animals and the environment Decades into the interrogation of our ethical and political responsibilities toward other animals fissures within the academy deepen as the interest in animal ethics and politics proliferates Although ideological fault lines have inspired important debates about how to address the very material concerns informing these theoretical discussions *Animal Subjects 2 0* brings together divergent voices to suggest how to foster richer human animal relations and to cultivate new ways of thinking and being with the rest of animalkind This collection demonstrates that appreciation of difference not just similarity is necessary for a more inclusive and compassionate world Linking issues of gender disability culture race and sexuality into species *Animal Subjects 2 0* maps vibrant developments in the emergent fields of critical animal studies and posthumanist thought

Animal Perception and Literary Language Donald Wesling, 2018-12-26 *Animal Perception and Literary Language* shows that the perceptual content of reading and writing derives from our embodied minds Donald Wesling considers how humans evolved from animals have learned to code perception of movement into sentences and scenes The book first specifies terms and questions in animal philosophy and surveys recent work on perception then describes attributes of multispecies thinking and defines a tradition of writers in this lineage Finally the text concludes with literature coming into full focus in twelve case studies of varied readings Overall Wesling s book offers not a new method of literary criticism but a reveal of what we all do with perceptual content when we read
