Australian Books and Authors in the American Marketplace 1840s-1940s David Carter,Roger Osborne,2018-07-02 Australian Books and Authors in the American Marketplace 1840s 1940s explores how Australian writers and their works were present in the United States before the mid twentieth century to a much greater degree than previously acknowledged Drawing on fresh archival research and combining the approaches of literary criticism print culture studies and book history David Carter and Roger Osborne demonstrate that Australian writing was transnational long before the contemporary period In mapping Australian literature s connections to British and US markets their research challenges established understandings of national imperial and world literatures Carter and Osborne examine how Australian authors editors and publishers engaged productively with their American counterparts and how American readers and reviewers responded to Australian works They consider the role played by British publishers and agents in taking Australian writing to America and

how the international circulation of new literary genres created new opportunities for novelists to move between markets Some of these writers such as Christina Stead and Patrick White remain household names others who once enjoyed international fame such as Dale Collins and Alice Grant Rosman have been largely forgotten The story of their books in America reveals how culture commerce and copyright law interacted to create both opportunities and obstacles for Australian writers

Nineteenth-Century Transatlantic Reprinting and the Embodied Book Jessica DeSpain, 2016-05-06 Until the Chace Act in 1891 no international copyright law existed between Britain and the United States which meant publishers were free to edit text excerpt whole passages add new illustrations and substantially redesign a book's appearance In spite of this ongoing process of transatlantic transformation of texts the metaphor of the book as a physical embodiment of its author persisted Jessica DeSpain's study of this period of textual instability examines how the physical book acted as a major form of cultural exchange between Britain and the United States that called attention to volatile texts and the identities they manifested Focusing on four influential works Charles Dickens's *American Notes for General Circulation* Susan Warner's *The Wide Wide World* Fanny Kemble's *Journal of a Residence on a Georgian Plantation* and Walt Whitman's *Democratic Vistas* DeSpain shows that for authors readers and publishers struggling with the unpredictability of the textual body the physical book and the physical body became interchangeable metaphors of flux At the same time discourses of destabilized bodies inflected issues essential to transatlantic culture including class gender religion and slavery while the practice of reprinting challenged the concepts of individual identity personal property and national identity
