The Shock of Recognition Lewis Pyenson, 2020-10-12 In The Shock of Recognition Lewis Pyenson uses a method called Historical Complementarity to identify the motif of non figurative abstraction in modern art and science He identifies the motif in Picasso's and Einstein's educational environments He shows how this motif in domestic furnishing and in urban lighting set the stage for Picasso's and Einstein's professional success before 1914 He applies his method to intellectual life in Argentina using it to address that nation's focus on an inventory of the natural world until the 1940s its adoption of non figurative art and nuclear physics in the middle of the twentieth century and attention to landscape painting and the wonder of nature at the end of the century

Polish Literature and the Holocaust Rachel Feldhay Brenner, 2019-04-15 In this pathbreaking study of responses to the Holocaust in wartime and postwar Polish literature Rachel Feldhay Brenner explores seven writers compulsive need to share their traumatic experience of witness with the world The Holocaust put the ideological convictions of Kornel Filipowicz J zef Mackiewicz Tadeusz Borowski Zofia Kossak Szczucka Leopold Buczkowski Jerzy Andrzejewski and Stefan Otwinowski to the

ultimate test Tragically witnessing the horror of the Holocaust implied complicity with the perpetrator and produced an existential crisis that these writers who were all exempted from the genocide thanks to their non Jewish identities struggled to resolve in literary form Polish Literature and the Holocaust Eyewitness Testimonies 1942 1947 is a particularly timely book in view of the continuing debate about the attitudes of Poles toward the Jews during the war The literary voices from the past that Brenner examines posit questions that are as pertinent now as they were then And so while this book speaks to readers who are interested in literary responses to the Holocaust it also illuminates the universal issue of the responsibility of witnesses toward the victims of any atrocity **Paperbound Books in Print** ,1971-07 **The Multitude in Spinoza**

Gonzalo Ricci Cernadas,2024-12-12 With the rise of populist governments and corresponding popular protests this book turns renewed focus on Baruch Spinoza s idea of the political multitude Acting at once as a body with a single mind and a state with its own political institutional structure the multitude mirrors some of the central actors in democratic movements across early 20th century Europe from Occupy Wall Street to Indignados and Nuit Debout Gonzalo Cernadas draws from two of Spinoza s key works on this subject in his Political Treatise and Theological Political Treatise setting out the progress of his ideas how Spinoza conceives of the body how that body can become part of the multitude and how that multitude can form a political society In recovering Spinoza s relevance to contemporary political phenomena Cernadas explains why this early modern thinker has found renewed importance three hundred and fifty years after his death and ultimately how he could even prompt us to reassess democracy as the best form of government **Essentials of Nonlinear Circuit**

Dynamics with MATLAB® and Laboratory Experiments Arturo Buscarino,Luigi Fortuna,Mattia Frasca,2017-04-07 This book deals with nonlinear dynamics of electronic circuits which could be used in robot control secure communications sensors and synchronized networks The genesis of the content is related to a course on complex adaptive systems that has been held at the University of Catania since 2005 The efforts are devoted in order to emulate with nonlinear electronic circuits nonlinear dynamics Step by step methods show the essential concepts of complex systems by using the Varela diagrams and accompanying MATLAB exercises to reinforce new information Special attention has been devoted to chaotic systems and networks of chaotic circuits by exploring the fundamentals such as synchronization and control The aim of the book is to give to readers a comprehensive view of the main concepts of nonlinear dynamics to help them better understand complex systems and their control through the use of electronics devices **Epioptics-9** Antonio Cricenti,2008 This special volume contains the proceedings of the 9th Epioptics Workshop held at the Ettore Majorana Foundation and Centre for Scientific Culture Erice Sicily from July 20 to 26 2006 The workshop was the 9th in the Epioptics series and the 39th of the International School of Solid State Physics The workshop was aimed at assessing the capabilities of state of the art optical techniques in elucidating the fundamental electronic and structural properties of semiconductor and metal surfaces interfaces thin layers and layer structures and at assessing the usefulness of these techniques for optimization of high quality
