Helmsing, Sietze Vellema, 2012-05-23 Lead firms development organisations donors and governments view value chains and voluntary standards as vital instruments for achieving millennium development goals through trade and market related interventions The precise foundations for these development strategies which suggest positive development outcomes from integration of poor actors into value chains are as yet underdeveloped The interdisciplinary work in this volume shows how trade is managed and asks theory driven questions about how value chains relate to locally rooted development processes Policy makers and development practitioners are increasingly using value chain analysis to frame pro poor development interventions This book offers multiple conceptualizations of development outcomes of inclusion of small producers firms and workers in value chains Processes of inclusion at different scales are unpacked in order to identify the terms of participation of small producers firms and workers As value chains are embedded the book further argues that inclusion can be conceptualized as the degree of alignment between value chain logics and the institutions and capacities in the local business system The combination of inclusive governance and endogenous development informs a grounded debate on roles of development oriented partnerships Chapters in this volume draw on multiple strands of economics sociology political science geography and management studies and for empirical grounding engage in comparative analysis of cases from Latin America SubSaharan Africa and East and South East Asia These are combined with processes taking place at a global level such as the proliferation of standards and the growth of roundtables and multi stakeholder partnerships The contributions explore contrasts between contexts between industries or commodities products and between conceptual frameworks and the context dependency of development impact necessitates cross case investigations This collection will be of interest to scholars in development studies economics business studies as well as to development policy makers **Marine and Coastal Protected Areas** Rodney V. Salm, John R. Clark, Erkki Siirila, 2000 This is a new edition of the classic textbook on marine protected area MPA management in the tropics originally produced as an output of the Bali World Parks Congress in 1982 Approaches to planning and managing MPAs have evolved considerably Major advances include innovative financing mechanisms partnerships with the private sector and NGOs and collaborative management between government and coastal communities These advances have brought new approaches for MPA establishment and management that are more participatory involving communities through interaction and collaboration rather than prescription With new case studies and illustrations the guide comes in a water resistant cover for field use It is intended for those who plan individual and or

national MPA systems and gives philosophical context for MPAs along with some basic principles and approaches

**Encyclopedia of Energy, Natural Resource, and Environmental Economics** ,2013-03-29 Every decision about energy involves its price and cost The price of gasoline and the cost of buying from foreign producers the price of nuclear and hydroelectricity and the costs to our ecosystems the price of electricity from coal fired plants and the cost to the atmosphere Giving life to inventions lifestyle changes geopolitical shifts and things in between energy economics is of high interest to Academia Corporations and Governments For economists energy economics is one of three subdisciplines which taken together compose an economic approach to the exploitation and preservation of natural resources energy economics which focuses on energy related subjects such as renewable energy hydropower nuclear power and the political economy of energy resource economics which covers subjects in land and water use such as mining fisheries agriculture and forests environmental economics which takes a broader view of natural resources through economic concepts such as risk valuation regulation and distribution Although the three are closely related they are not often presented as an integrated whole This Encyclopedia has done just that by unifying these fields into a high quality and unique overview The only reference work that codifies the relationships among the three subdisciplines energy economics resource economics and environmental economics Understanding these relationships just became simpler Nobel Prize Winning Editor in Chief joint recipient 2007 Peace Prize Jason Shogren has demonstrated excellent team work again by coordinating and steering his Editorial Board to produce a cohesive work that guides the user seamlessly through the diverse topics This work contains in equal parts information from and about business academic and government perspectives and is intended to serve as a tool for unifying and systematizing research and analysis in business universities and government **Marine Mammal Research Program of the Northeast Fisheries Science Center During 1990-95** Janeen M. Quintal,1999 **The Economics of Marine Resources and Conservation Policy** James A. Crutchfield,Arnold Zellner,2010-04-15 How can we manage a so called renewable natural resource such as a fishery when we don t know how renewable it really is James A Crutchfield and Arnold Zellner developed a dynamic and highly successful economic approach to this problem drawing on extensive data from the Pacific halibut industry Although the U S Department of the Interior published a report about their findings in 1962 it had very limited distribution and is now long out of print This book presents a complete reprint of Crutchfield and Zellner s pioneering study together with a new introduction by the authors and four new papers by other scholars These new studies cover the history of the Pacific halibut industry as well as the general and specific contributions of the original work such as price oriented conservation policy to the fields of resource economics and management The resulting volume integrates theory and practice in a clear well contextualized case study that will be important not just for environmental and resource economists but also for leaders of industries dependent on any natural resource **Bleeding-Edge Entrepreneurship** João J. Ferreira,Patrick J. Murphy,2023-01-26 This book contains an Open Access chapter Bleeding edge Entrepreneurship

illuminates new possibilities within the domain of business theory and practice expanding entrepreneurship's massive potential to create unexplored physical and virtual realms      **Blue Bioeconomy** Riti Thapar Kapoor, Mika Sillanpää, Mohd Rafatullah, 2024-11-29 The marine environment is an abundant source of organisms which are rich in functional bioactive compounds. Many of these compounds exhibit a remarkable potential for medical, industrial, and biotechnological applications. Handled appropriately with a focus on sustainability, these organisms and compounds can offer new and renewable feedstocks for a variety of industries. The biomass from marine organisms also offers opportunities for clean and sustainable fuel generation, carbon sequestration, and wastewater remediation. Focusing on the use of biomass from marine algae, both macro and micro bacteria, and yeasts, this book looks at opportunities for producing high-value chemicals with applications across multiple industries. It is an essential read for researchers interested in innovative green feedstock sources, sustainability, and the circular economy.
