This manual was prepared to provide the astronaut with a single source reference as to the characteristics and functions of the SA 503 launch vehicle and the AS 503 manned flight mission. A revision to the manual incorporating the latest released data on the vehicle and mission will be released approximately 30 days prior to the scheduled launch date. The manual provides general mission and performance data, emergency detection system information, a description of each stage and the IU, and a general discussion of ground support facilities, equipment, and mission control. A bibliography identifies additional references if a more comprehensive study is desired.

Saturn V Flight Manual Sa 503 NASA, George Marshall Space Flight Center, NASA Manned Spacecraft Center, 2012-06. From the foreword: This manual was prepared to provide the astronaut with a single source reference as to the characteristics and functions of the SA 503 launch vehicle and the AS 503 manned flight mission. The manual provides general mission and performance data, emergency detection system information, a description of each stage and the IU, and a general discussion of ground support facilities, equipment, and mission control. A bibliography identifies additional references. This important historical reprint is profusely illustrated throughout and a great addition to the book collections of all space flight enthusiasts.

Saturn Ib Flight Manual (Skylab Saturn 1b Rocket) NASA, 2012-06-01. This Saturn IB Flight Manual provides launch vehicle systems descriptions and predicted performance data for the Skylab missions. Vehicle SL 2 SA 206 is the baseline for this manual, but as a result of the great similarity, the material is representative of SL 3 and SL4 launch vehicles also. The Flight Manual is not a control document but is intended primarily as an aid to astronauts who are training for Skylab missions. In order to provide a comprehensive reference for that purpose, the manual also contains descriptions of the ground support interfaces, prelaunch operations, and emergency procedures. Mission variables and constraints are summarized, and mission control monitoring and data flow during launch preparation and flight are discussed. This manual was prepared under the direction of the Saturn Program Engineering Office, PM SAT E, Marshall Space Flight Center, Alabama 35812. Illustrated throughout. This is a high quality reprint with some occasional limitations on the quality of the photographs, but the many line drawings and technical drawings are excellent throughout.
