Subject of Race in American Science Fiction Sharon DeGraw, 2006-12-19 While the connections between science fiction and race have largely been neglected by scholars racial identity is a key element of the subjectivity constructed in American SF In his Mars series Edgar Rice Burroughs primarily supported essentialist constructions of racial identity but also included a few elements of racial egalitarianism Writing in the 1930s George S Schuyler revised Burroughs normative SF triangle of white author white audience and white protagonist and promoted an individualistic highly variable concept of race instead While both Burroughs and Schuyler wrote SF focusing on racial identity the largely separate genres of science fiction and African American literature prevented the similarities between the two authors from being adequately acknowledged and explored Beginning in the 1960s Samuel R Delany more fully joined SF and African American literature Delany expands on Schuyler's racial constructionist approach to identity including gender and sexuality in addition to race Critically intertwining the genres of SF and African American literature allows a critique of the racism in the science fiction and a more accurate and positive portrayal of the scientific connections in the African American literature Connecting the popular fiction of Burroughs the controversial career of Schuyler and the postmodern texts of Delany illuminates a gradual change from a stable essentialist construction of racial identity at the turn of the century to the variable social construction of poststructuralist subjectivity today **The Puzzles of Mars: A Mathematical Journey** Richard M. Beekman, 2017-05-14

The Stuff of Science Fiction
 Gary Westfahl, 2022-09-27 While students and general readers typically cannot relate to esoteric definitions of science fiction, they readily understand the genre as a literature that characteristically deals with subjects such as new inventions, space, robot, and aliens. This book looks at science fiction in precisely this manner, with twenty-one chapters that each deal with a subject that is repeatedly addressed in science fiction of recent centuries. Based on a packet of original essays that the author assembled for his classes, the book could serve as a supplemental textbook in science fiction classes but also contains material of interest to science fiction scholars and others devoted to the genre. In some cases, chapters offer thorough surveys of numerous works involving certain subjects such as imagined vehicles, journeys beneath the Earth, and undersea adventures discovering intriguing patterns in the ways that various writers developed their ideas. When comprehensive coverage of ubiquitous topics such as robots, aliens, and the planet Mars is impossible, chapters focus on major themes, referencing selected texts. A conclusion discusses other science fiction subjects that were omitted for various reasons, and a bibliography lists additional resources for the study of science fiction in general and the topics of each chapter.

The Martian's Daughter Marina Whitman,2012-08-31 One of the five Hungarian scientific geniuses dubbed the Martians by their colleagues John von

Neumann is often hailed as the greatest mathematician of the twentieth century and even as the greatest scientist after Einstein. He was a key figure in the Manhattan Project, the inventor of game theory, the pioneer developer of the modern stored program electronic computer, and an adviser to the top echelons of the American military establishment. In *The Martian's Daughter*, Marina von Neumann Whitman reveals intimate details about the famed scientist and explores how the cosmopolitan environment in which she was immersed, the demanding expectations of her parents, and her own struggles to emerge from the shadow of a larger-than-life parent shaped her life and work. Unfortunately, von Neumann did not live to see his daughter rise to become the first or highest ranking woman in a variety of arenas. Whitman became a noted academic during the 1960s and 70s, casting her teaching and writing in the framework of globalization before the word had been invented. She became the first woman ever to serve on the President's Council of Economic Advisers and participated actively in U.S. efforts to reshape the international monetary and financial system during the early 1970s. She pioneered the role of women on the boards of leading multinational corporations and became the highest ranking female executive in the American auto industry in the 1980s. In her memoir, Whitman quotes from personal letters from her father and describes her interactions with such figures as Roger Smith of GM and President Nixon. She also details the difficulties she encountered as an early entrant into a world dominated by men and how she overcame the obstacles. In her words, she has it all.

Through The Hourglass John Hill, 2012-01-17 Jason Bond is a regular guy working two jobs and trying to get his life back on track after caring for and losing his mother and two of his sisters to illness in a short few years. Working in retail during the day and as a security guard at night, Jason was trying to work his way to finally achieving his long-held dream of returning to college and getting his degree. But on a night at his security job while a major snowstorm bore down upon the southern foothills of North Carolina, Jason Bond was suddenly pulled five hundred years into the future and into a world very different from his own. Gone were the small Southern towns of Forest City, Spindale, and Rutherfordton, replaced by a massive sprawling metropolis known as Rutherford City, running over both North and South Carolina and home to over a billion humans and aliens.

The Spacesuit Film Gary Westfahl, 2014-01-10 Filmmakers employ various images to suggest the strangeness of outer space, but protective spacesuits most powerfully communicate its dangers and the frailty of humans beyond the cradle of Earth. Many films set in space, however, forgo spacesuits altogether, reluctant to hide famous faces behind bulky helmets and ill-fitting jumpsuits. This critical history comprehensively examines science fiction films that portray space travel realistically and sometimes not quite so by having characters wear spacesuits. Beginning with the pioneering *Himmelskibet* (1918) and *Woman on the Moon* (1929), it discusses other classics in this tradition, including *Destination Moon* (1950), *Riders to the Stars* (1954), and *2001: A Space Odyssey* (1968). C, films that gesture toward realism but betray that goal with melodramatic villains, low comedy, or improbable monsters. D, the distinctive spacesuit films of Western Europe, Russia, and Japan. E, America's spectacular real-life spacesuit film, the televised Apollo 11 moon landing (1969).

The Thing in the Stone Clifford D.

Simak, 2017-07-04 A mind opening collection of short science fiction from one of the genre's most revered Grand Masters. Legendary author Robert A. Heinlein proclaimed, "To read science fiction is to read Simak." A reader who does not like Simak stories does not like science fiction at all. The remarkably talented Clifford D. Simak was able to ground his vast imagination in reality and then introduce readers to fantastical worlds and concepts they could instantly and completely dig into, comprehend, and enjoy. In the title story, a man's newfound ability to walk in the past allows him to dwell among dinosaurs, saber-toothed tigers, and something even more timeless. In "Construction Shack," the first manned expedition to Pluto reveals that no matter how advanced aliens may be, even they don't always get everything right. And in "Univac 2200," the thin line between humans creating technology and humans becoming technology is about to be crossed, and there may be no going back. Each story includes an introduction by David W. Wixon, literary executor of the Clifford D. Simak estate and editor of this ebook.
