*The Making of the American Dream, Vol. II* Lewis E. Kaplan, 2009 Any history that touts itself as unconventional is bound to raise some hackles when it challenges traditional interpretations of our nation s past Yet history is continually under revision This 2 volume work covering America s first 300 years differs from others in seeking to debunk numerous flattering and conventionally accepted myths aReading between the lines of what we ve all been taught as US history the author probes a little deeper into what perhaps was never denied but was never spelled out either Some inconvenient questions emerge Was lust for land the driving force behind every war in US history In a lively narrative Kaplan demonstrates that in many ways Lincoln was our worst wartime president save Madison and that Reconstruction was doomed from the start The author describes how an agricultural hinterland evolved into an industrial colossus and a society of small towns grew into a nation of large cities When it did what had once been the world s leading republican government gradually edged towards becoming a democracy a form of government abjured by the Founding Fathers The War Between the States and the rapid industrialization of the North was made possible by tapping the vast resources which lay underneath the land Oil coal iron ore copper zinc and other minerals made the US the richest and most powerful nation in the world by the end of the nineteenth century when this book concludes The book also chronicles the fledgling Labor movement in the 19th century handily discredited through equation with anarchists and explores the cynicism with which McKinley embarked on the Spanish American War The basic thrust of this 2 volume work is neither to expose America s blemishes nor to eulogize its virtues a Rather the author focuses on US history from a different perspective than is usually accepted Readers may disagree

with his interpretations but will find his arguments intriguing
