On Global Justice Mathias Risse, 2012-09-16 Debates about global justice have traditionally fallen into two camps. Statists believe that principles of justice can only be held among those who share a state. Those who fall outside this realm are merely owed charity. Cosmopolitans on the other hand believe that justice applies equally among all human beings. On Global Justice shifts the terms of this debate and shows how both views are unsatisfactory. Stressing humanity's collective ownership of the earth, Mathias Risse offers a new theory of global distributive justice, what he calls pluralist internationalism, where in different contexts different principles of justice apply. Arguing that statists and cosmopolitans seek overarching answers to problems that vary too widely for one single justice relationship, Risse explores who should have how much of what we all need and care about, ranging from income and rights to spaces and resources of the earth. He acknowledges that especially demanding redistributive principles apply among those who share a country, but those who share a country also have obligations of justice to those who do not, because of a universal humanity, common political and economic orders, and a linked global trading system. Risse's inquiries about ownership of the earth give insights into immigration obligations to future generations and obligations arising from climate change. He considers issues such as fairness in trade, responsibilities of the WTO, intellectual property rights, labor rights, whether there ought to be states at all, and global inequality, and he develops a new foundational theory of human rights.

Russian Oil Supply John D. Grace, 2005 *Russian Oil Supply* traces the development of the Russian oil industry from its inception in the 1870s through the present. The fundamental geology of the two main producing basins, Volga-Ural and West Siberia, is presented along with a review of key production technologies. The technical, economic, and policy aspects of achieving the 1987-88 peak production are described, as well as the mechanics of the production collapse that followed, and since 1999 the recovery of Russian output. The performance of Russia's major oil companies, independents, and joint ventures is analyzed, and conclusions drawn on the future course of production and exports.
