Deus in Machina Jeremy Stolow, 2012-11-05 The essays in this volume explore how two domains of human experience and action religion and technology are implicated in each other Contrary to commonsense understandings of both religion as an otherworldly orientation and technology as the name for tools techniques and expert knowledges oriented to this world the contributors to this volume challenge the grounds on which this division has been erected in the first place What sorts of things come to light when one allows religion and technology to mingle freely In an effort to answer that question *Deus in Machina* embarks upon an interdisciplinary voyage across diverse traditions and contexts where religion and technology meet from the design of clocks in medieval Christian Europe to the healing power of prayer in premodern Buddhist Japan to 19th century Spiritualist devices for communicating with the dead to Islamic debates about kidney dialysis in contemporary Egypt to the work of disability activists using documentary film to reimagine Jewish kinship to the representation of Haitian Vodou on the Internet among other case studies Combining rich historical and ethnographic detail with extended theoretical

Styles of Creation George Edgar Slusser, Eric S. Rabkin, 1992 The impetus behind this collection of original essays is the tension between the aesthetic emphasis on stylistics in science fiction and fantasy writing and the critical limitations imposed by prevailing literary theory From a variety of perspectives the contributors show how a new or expanded set of methods and models can enrich critical exchange within the genre and between it and other types of fiction The focus of the book is not entirely on critical restraints but also on the genre's robustly subversive creative drive its unwillingness or inability to pause for critical validation The essays examine the proliferation of stylistic acts and experiments in science fiction and fantasy writing as assess the genre's revolutionary qualities its reordering of narrative priorities inversion of consecrated categories and elevation of minor devices

Capital and the Cosmos Peter Dickens, 2023-01-01 This book offers a new understanding of society's relations with the cosmos Entrepreneurs such as Jeff Bezos and Elon Musk receive a great deal of publicity but offer unlikely and implausible visions of space tourism for the general public Meanwhile asteroids are seen as rare materials which will be extracted and used to produce untold riches for earthbound citizens The reality is rather different First there is no evidence that owners of capital are attempting to extract rare materials in the cosmos The costs would be out of this world But capital not governments is determining how outer space should be used Capital's investments in aerospace companies are actively determining forms of military interventions and the equipment used And satellite television pumps out forms of culture aimed at a global audience But these are being ignored and subverted by for example indigenous peoples In short this book sets out a new understanding of our relations with the cosmos The forces of capital are certainly powerful but at the same time they are being challenged subverted and even overturned

Terraforming: Ecopolitical Transformations and Environmentalism in Science Fiction Chris Pak, 2016-06-01 This book examines terraforming in science fiction and shows how amidst contemporary anxieties about climate change it has come to offer an important vantage from which to consider the ways humankind shapes and is shaped by their world

Exploring the Next Frontier Matthew Wilhelm Kapell, 2016-02-19 The 1960s and early 70s saw the evolution of Frontier Myths even as scholars were renouncing the interpretive value of myths themselves Works like Joe Haldeman's *The Forever War* exemplified that rejection using his experiences during the Vietnam War to illustrate the problematic consequences of simple mythic idealism Simultaneously Americans were playing with expanded and revised versions of familiar Frontier Myths though in a contemporary context through NASA's lunar missions *Star Trek* and Gerard K O'Neill's High Frontier This book examines the reasons behind the exclusion of Frontier Myths to the periphery of scholarly discourse and endeavors to build a new model for understanding their enduring significance This model connects NASA's failed attempts to recycle earlier myths wholesale to *Star Trek*'s revision of those myths and rejection of the idea of a frontier paradise to O'Neill's desire to realize such a paradise in Earth's orbit This new synthesis defies the negative connotations of Frontier Myths during the 1960s and 70s and attempts to resuscitate them for relevance in the modern academic context

Regulation and Economic Analysis R.L. Gordon,1994-04-30

Regulation and Economic Analysis A Critique Over Two Centuries argues that long experience with the practice of regulation creates a broad anti intervention consensus among economists This consensus is based on comparison of real intervention to real markets rather than an ideological preconception It is shown that economic theory can support all possible positions on intervention Much theory is too abstract to support any policy position many arguments about how intervention might help contain qualifications expressing doubts about whether the potential can be realized many theories illustrate the drawbacks of intervention The vast literature on these issues concentrates either on specific cases or polemics that exaggerate both sides of the argument Regulation and Economic Analysis seeks to show the depth of the discontent develop interpretations of economic theory that follow from skepticism about statism and provide selected illustrations The discussion begins with examination of general equilibrium theory and proceeds to discuss market failure with stress on monopoly and particularly what is deemed excessive concern with predatory behavior International trade issues transaction costs property rights economic theories of government the role of special institutions such as contracts the defects of macroeconomic and equity arguments for regulating individual markets environmental economics and the defects of public land management policies are examined The Unesco Courier ,1984-11
