systems have the potential to offer highly intuitive user interfaces as they allow systems to be controlled using natural language. However, the complexity inherent in natural language dialogs means that careful testing of the system must be carried out from the very beginning of the design process. This book examines how user models can be used to support such early evaluations in two ways: by running simulations of dialogs and by estimating the quality judgments of users. First, a design environment supporting the creation of dialog flows, the simulation of dialogs and the analysis of the simulated data is proposed. How the quality of user simulations may be quantified with respect to their suitability for both formative and summative evaluation is then discussed. The remainder of the book is dedicated to the problem of predicting quality judgments of users based on interaction data. New modeling approaches are presented which process the dialogs as sequences and which allow knowledge about the judgment behavior of users to be incorporated into predictions. All proposed methods are validated with example evaluation studies.

**Introduction to Video Search Engines** David C. Gibbon, Zhu Liu, 2008-09-20 The evolution of technology has set the stage for the rapid growth of the video Web. Broadband Internet access is ubiquitous and streaming media protocols, systems and encoding standards are mature. In addition to Web video delivery, users can easily contribute content captured on low cost camera phones and other consumer products. The media and entertainment industry no longer views these developments as a threat to their established business practices but as an opportunity to provide services for more viewers in a wider range of consumption contexts. The emergence of IPTV and mobile video services offers unprecedented access to an ever growing number of broadcast channels and provides the flexibility to deliver new, more personalized video services. Highly capable portable media players allow us to take this personalized content with us and to consume it even in places where the network does not reach. Video search engines enable users to take advantage of these emerging video resources for a wide variety of applications including entertainment, education and communications. However, the task of information extraction from video for retrieval applications is challenging, providing opportunities for innovation. This book aims to first describe the current state of video search engine technology and second to inform those with the requisite technical skills of the opportunities to contribute to the development of this field.

Today's Web search engines have greatly improved the accessibility and therefore the value of the Web.

**Popular Science**, 1997-05 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better and science and technology are the driving forces that will help make it better.

**X: The Experience When Business Meets Design** Brian Solis, 2015-10-13 Welcome to a new era of business in which your brand is defined by those who experience it Do you know how your customers experience your brand today Do you know how they really feel Do you know what they say when you are not around In an always on world where everyone is connected to information and also one another customer experience is your brand And without defining experiences brands become victim to whatever people feel and share In his new book X The Experience When Business Meets Design bestselling author Brian Solis shares why great products are no longer good enough to win with customers and why creative marketing and delightful customer service too are not enough to succeed In X he shares why the future of business is experiential and how to create and cultivate meaningful experiences This isn't your ordinary business book The idea of a book was reimagined for a digital meets analog world to be a relevant and sensational experience Its aesthetic was meant to evoke emotion while also giving new perspective and insights to help you win the hearts and minds of your customers And the design of this book along with what fills its pages was done using the principles shared within Brian shares more than the importance of experience You'll learn how to design a desired meaningful and uniform experience in every moment of truth in a fun way including How our own experience gets in the way of designing for people not like us Why empathy and new perspective unlock creativity and innovation The importance of User Experience UX in real life and in executive thinking The humanity of Human Centered Design in all you do The art of Hollywood storytelling from marketing to product design to packaging Apple's holistic approach to experience architecture The value of different journey and experience mapping approaches The future of business lies in experience architecture and you are the architect Business meets design X

Digital Terrestrial Television in Europe Allan Brown, Robert G. Picard, 2004-09-22 Digital technology for the production transmission and reception of television is expected to replace analogue transmission throughout the world The timetable for this transition is uncertain and different projections have been made for virtually every country in the world This book gives the exhaustive details of the issues of this changeover in Europe and elsewhere The details are placed within the context of the massive changes which the television industry has been subjected to over the past 25 years The rollout of digital terrestrial television DTTV in Europe is a significant issue for every country included in this survey It is of such importance because DTTV is the centerpiece of many governments policies toward making Europe the world leader in new information and communication technologies These same governments are all wrestling with the

issues of how to use the technology in ways that create both commercial and non commercial value European perspectives on the social cultural and political nature of broadcasting vary significantly from those in other parts of the world and require that the introduction of DTTV should be handled differently to its introduction elsewhere There are enormous technical political and economic aspects to be considered and these vary from country to country in Europe The two editors bring a perspective to this study as media economists who come to the European scene from other parts of the world The book covers DTTV in depth and it also includes discussions of cable satellite broadband and Internet technology for comparison
