The National Interest March April 20:

U.S. Immigration Policy and the National Interest United States. Select Commission on Immigration and Refugee Policy, 1981

The American Way of Strategy Michael Lind, 2008-07-30 In *The American Way of Strategy* Lind argues that the goal of U S foreign policy has always been the preservation of the American way of life embodied in civilian government checks and balances a commercial economy and individual freedom Lind describes how successive American statesmen from George Washington Thomas Jefferson and Alexander Hamilton to Franklin Roosevelt Dwight Eisenhower and Ronald Reagan have pursued an American way of strategy that minimizes the dangers of empire and anarchy by two means liberal internationalism and realism At its best the American way of strategy is a well thought out and practical guide designed to preserve a peaceful and demilitarized world by preventing an international system dominated by imperial and militarist states and its disruption by anarchy When American leaders have followed this path they have led our nation from success to success and when they have deviated from it the results have been disastrous Framed in an engaging historical narrative the book makes an important contribution to contemporary debates *The American Way of Strategy* is certain to change the way that Americans understand U S foreign policy

The National Interest in Question Christopher Hill, 2013-08-22 For three decades multiculturalism has been the focus of fierce debates At the same time Europeans have worried at the national level and at that of the European Union about how to relate to a world in which their influence has been steadily reducing But the two discussions on society and on foreign policy have rarely intersected The events of 11 September 2001 did shock the citizens of Western countries into an awareness that international politics could literally explode onto their home streets and generated fear and suspicion about and among minority groups But the excessive focus on terrorism and on Islam which followed hardly did justice to the deeper processes of transnationally induced change which were at work This book attempts to go beyond the emotive political debate to show how foreign policy and domestic society have been becoming more entangled with each other for some time It focuses on the more established Member States of the European Union and the varying paths which they have taken in coping with the new domestic environment fostered by increased migration ethnocultural diversity and transnational relations It investigates the contrasting approaches taken by the European states to what is loosely called multiculturalism and analyses their impact on the interplay between foreign policy and domestic society something which is now a structural feature of political life It concludes with the argument that since domestic society is now taking on some of the diversity associated with international relations governments can no longer assume a national consensus in their relations with the outside world let alone the steady homogenisation of world society

Israel and the Neoconservatives Adam L. Fuller, 2019-11-08 For forty years the neoconservatives have been an influential wing on the American Right Their critics accuse them of being more loyal to a foreign government than to American interests But is that true In this book the author argues that their support of Israel is rooted just as much in their

liberal democratic priorities *Federal Register*, 1951 *National Interests And Presidential Leadership* Donald E. Nuechterlein, 2019-04-10 Many scholars have ignored the concept of national interest simply because no logical systematic means of dealing with this key aspect of international politics has been available A new approach to defining national interest forms the basis for this study of presidential decisions on U S involvement in foreign wars Professor Nuechterlein looks at various crisis situations to determine what defense economic world order and ideological interests are at stake he identifies sixteen cost risk and value factors that affect the U S view of which interest is most vital in a given situation In any dispute it is the interest that is considered vital too important to compromise that is the key element in crisis decisions Professor Nuechterlein uses his analytical framework to examine the ways Presidents Wilson Roosevelt Truman Johnson and Nixon perceived the national interest when making their decisions to begin or extend U S war involvement He assesses the value of National Security Council participation in the decision making process and presents case study analyses of three imminent U S foreign policy concerns Quebec s possible separation from Canada the Panama Canal Treaty and the potential for race war in South Africa with an epilogue on the challenges facing Carter The author suggests that the most important U S national interest in the future will be economic with energy conservation a top priority **Putnam's Magazine. Original Papers on Literature, Science, Art, and National Interests**, 1854 **The Drone Wars** Seth J. Frantzman, 2021-06-22 In the battle for the streets of Mosul in Iraq drones in the hands of ISIS terrorists made life hell for the Iraq army and civilians Today defense companies are racing to develop the lasers microwave weapons and technology necessary for confronting the next drone threat Seth J Frantzman takes the reader from the midnight exercises with Israel s elite drone warriors to the CIA headquarters where new drone technology was once adopted in the 1990s to hunt Osama bin Laden This rapidly expanding technology could be used to target nuclear power plants and pose a threat to civilian airports In the Middle East the US used a drone to kill Iranian arch terrorist Qasem Soleimani a key Iranian commander Drones are transforming the battlefield from Syria to Libya and Yemen For militaries and security agencies the main users of expensive drones the UAV market is expanding as well there were more than 20 000 military drones in use by 2020 Once the province of only a few militaries drones now being built in Turkey China Russia and smaller countries like Taiwan may be joining the military drone market It s big business too 100 billion will be spent over the next decade on drones Militaries may soon be spending more on drones than tanks much as navies transitioned away from giant vulnerable battleships to more agile ships The future wars will be fought with drones and won by whoever has the most sophisticated technology [The SAGE Handbook of Asian Foreign Policy](#) Takashi Inoguchi, 2021-08-04 Comprising 60 3 percent of the world s 7 2 billion population Asia is an enigma to many in the West Hugely dynamic in its demographic economic technological and financial development its changes are as rapid as they are diverse The SAGE Handbook of Asian Foreign Policy provides the reader with a clear balanced and comprehensive overview on Asia s foreign policy and accompanying theoretical trends Placing the diverse and dynamic substance of Asia s
