**In the Wake of Freedom** S. P. Agrawal, 1997 *The Palgrave Handbook of Disciplinary and Regional Approaches to Peace* Oliver Richmond, Sandra Pogodda, Jasmin Ramovic, 2016-03-15 In this handbook a diverse range of leading scholars consider the social cultural economic political and developmental underpinnings of peace This handbook is a much needed response to the failures of contemporary peacebuilding missions and narrow disciplinary debates

both of which have outlined the need for more interdisciplinary work in International Relations and Peace and Conflict studies. Scholars, students and policymakers are often disillusioned with universalist and northern dominated approaches and a better understanding of the variations of peace and its building blocks across different regions is required. Collectively, these chapters promote a more differentiated notion of peace employing comparative analysis to explain how peace is debated and contested.

**Borderland Battles** Annette Idler, 2019. This book argues that borderlands intensify security threats at the conflict-crime nexus. It demonstrates the multiple insecurities that arise from complex interactions among rebels, criminals and other violent non-state groups. Challenging urban biases and state-centric views, it draws on unprecedented multi-year fieldwork in the war-torn, marginalized Colombian, Ecuadorian and Colombian Venezuelan borderlands.

**The Short Guide to International Development** Nick Sage, 2022-07-19. International development is a vibrant interdisciplinary area of the social sciences. This Short Guide offers a uniquely succinct and balanced account of this politically charged subject. It distils both the classic and newer debates together in a clear framework and illustrates them with contemporary examples. Designed to introduce a wide readership to international development, the book considers how far the field has been reconfigured over time and to what extent it is likely to change in the future. Reviews contemporary topics including tourism, migration and digital technologies, includes distinctive international case studies and examples. By providing a succinct evaluation of competing approaches to and perspectives on the idea and practice of international development, this book offers students across the social sciences a distinct and invaluable introduction to the field.

**Integral Human Development** Séverine Deneulin, Clemens Sedmak, 2023-08-15. This volume brings into conversation two major moral traditions in the social sciences and humanities that offer common areas for understanding, interpreting and transforming the world. Over the last decade, moral theologians who work on issues of poverty, social justice, human rights and political institutions have been finding inspiration in the capability approach (CA). Conversely, social scientists who have been working on issues of poverty and social justice from a CA perspective have been finding elements in the Catholic social tradition (CST) to overcome some of the limitations of the CA, such as its vagueness regarding what counts as a valuable human life and its strong individual focus. Integral Human Development brings together for the first time social scientists and theologians in dialogue over their respective uses of CST and CA. The contributors discuss what their mutual grounds are, where they diverge and where common areas of collaboration and transformative action can be found. The contributors offer a critical analysis of CA from the perspective of theology. They also provide an original account of CST. The book offers a broader historical, biblical, social, economic, political and ecological understanding of CST than that which is currently available in the CST literature. The book will interest students and practitioners in global affairs, development studies or the social sciences who seek to better understand the Catholic tradition and its social teachings and what they can offer to address current socio-environmental challenges.
